Full analysis

Overview

Desertcart India is an established cross-border ecommerce storefront that sources physical consumer goods internationally and presents Indian customers with localized, customs-inclusive pricing, tracked delivery, buyer protection, returns, refunds, and multiple customer-support channels.

Scam/Impersonation Risk

No identity contradictions, phishing characteristics, brand impersonation, or malicious behavior were observed. The ordinary retail model is consistently represented across the homepage: products are priced in Indian rupees and fulfilled from international markets, without cryptocurrency, investment, or financial-return propositions. Independent reputation telemetry is clean, while the long-standing domain and continuous historical record strongly support provenance.

- The homepage presents a populated physical-goods catalog and ordinary account, cart, order-tracking, and shopping functions, with no hidden or externally submitted sensitive forms detected.
- External reputation checks recorded zero malicious and zero suspicious detections, no malicious safe-browsing classification, no reported abuse, and an established global traffic rank of 68,262.
- The domain was registered in 2017 and is approximately 9.18 years old.
- The web archive contains 284 snapshots spanning 2019–2026, representing eight years of tracked history without detected repurposing or semantic drift.

Regulatory Verification Notes

The homepage identifies Desertcart Holdings Limited and describes consumer protections including customs-and-duties-inclusive prices, 30-day returns, and full refunds for goods arriving damaged, missing, or materially misdescribed. The domain registration identifies Desertcart Trading FZE as the registrant through Gandhi SAS. The available material does not establish a specific regulatory authorization, but this is not inherently adverse for the represented activity of selling ordinary consumer goods; no governance opacity or conflicting legal identities were identified.

- The homepage names Desertcart Holdings Limited and publishes buyer-protection, returns, refund, delivery, and human-support commitments.
- The domain registration records Desertcart Trading FZE as the organization, Gandhi SAS as registrar, and an expiration date of 1 June 2027.

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate valid until 3 October 2026.
- No investment, brokerage, cryptocurrency, staking, or other regulated financial-service offering appears in the assessed homepage content.

What to Verify Next

For higher-value orders, prospective customers can retain the displayed landed-price terms, confirm delivery estimates and return eligibility for the selected item, and review the applicable checkout terms before payment. Official customer-service channels can also be confirmed independently where an order requires unusual handling or warranty support.

- The homepage states that displayed prices include customs duties and import taxes.
- The homepage advertises tracked delivery, with most orders expected within three to seven days.
- The homepage offers 30-day returns and full refunds for items received broken, missing, or not as described.

Summary Verdict

The website presents a legitimate, established, and trustworthy ecommerce operation with strong convergence across identity, historical continuity, reputation, content quality, and observed behavior. No contradictory risk signals were found, and the overall posture supports normal commercial engagement.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF layer, limiting direct exposure of the origin server; this is a standard protective control and a mitigating infrastructure signal, not standalone proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc.); the observed address was a Cloudflare edge endpoint.
- All observed addresses—172.67.71.48, 104.26.10.249, and 104.26.11.249—were CDN edge addresses rather than a directly exposed origin.

Closing Assessment

Normal interaction, including account login, routine account activity, and standard purchases, is appropriate, subject to ordinary ecommerce precautions for order details and payment records.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about desertcart.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
