

Is destiny89.com safe? TrustSniffer's moderate-trust assessment: 65/100

destiny89.com

Verdict

65

OUT OF 100

MODERATE TRUST

destiny89.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Brochure-style site for 'Destiny House' guest house in South Delhi with descriptions of rooms and amenities, phone and email contact, and physical addresses for Kalkaji (New Delhi) and Faridabad.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Destiny House is a brochure-style hospitality website advertising guest-house accommodation for business and tourist travellers in South Delhi, with room amenities, booking enquiries, telephone contact, and locations identified in Kalkaji, New Delhi, and Faridabad.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other active contradiction was observed. The homepage presents a conventional local hospitality model, describing rooms, Wi-Fi, television, hot and cold water, room service, tariffs, and booking contact rather than soliciting credentials or unusual financial transfers. The apparent business identity is supported by consistent accommodation content, stated physical locations, and linked social profiles, although the operator's real-world identity remains likely rather than independently verified. Available external checks did not identify malicious or suspicious results, while coverage was not comprehensive.

EVIDENCE

- The homepage identifies “Destiny House” as a guest house and describes rooms, amenities, tariffs, and booking contact.
- The contact and location content identifies Kalkaji in New Delhi and Faridabad as operating locations.
- Interactive testing of the homepage recorded no login form, hidden sensitive form, wallet connection, external POST activity, or suspicious script behavior.
- The domain was registered on 2012-08-29 and is approximately 13.99 years old; archival records contain 381 snapshots spanning 2013-07-12 to 2026-03-01, covering 14 tracked years.

Regulatory Verification Notes

The website appears to operate as a local accommodation business rather than a financial or otherwise regulated service. Its pages provide business descriptions, amenities, locations, and contact routes, but the supplied content does not present a hospitality registration, permit, company-registration detail, or other formal licensing information. This is a transparency and verification gap, not evidence of deception. Links to Facebook, LinkedIn, and Twitter provide some external identity context, but they do not independently establish the legal operator. No matching broker-reputation record was identified in the supplied third-party context.

EVIDENCE

- The homepage and accommodation pages describe guest-house services and booking enquiries without presenting a licence number or regulatory authority.
- The site links to Facebook, LinkedIn, and Twitter, providing three named social-platform channels associated with the presented business.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-11-05.
- The site returned stable successful responses during testing, with no external network activity detected.

What to Verify Next

Before a high-value booking or advance payment, an independent party should confirm that the stated Kalkaji and Faridabad locations correspond to the advertised accommodation and that the booking contact channels are controlled by the same operator. Payment should use a method offering appropriate dispute or chargeback protection, and any locally required hospitality registration should be checked with the relevant authority where applicable. Credentials should not be reused on this site or supplied through an unexpected follow-up message.

EVIDENCE

- The homepage provides the accommodation description, booking call-to-action, telephone contact, and stated locations to support independent confirmation.
- The contact page is the appropriate place to compare published booking details with information obtained through an independent route.
- The supplied page analysis found no sensitive submission form, so booking appears to depend primarily on direct enquiry rather than on-site credential collection.

Summary Verdict

The site has a **moderate-trust posture** and appears consistent with an established, apparently legitimate local guest-house business. Its long operating history, sustained archival presence, coherent hospitality content, stable behavior, and absence of identified contradiction support routine confidence, while the operator connection is not independently proven and the available evidence does not justify treating it as suitable for high-value commitments without additional validation.

Infrastructure Integrity

The site is hosted directly through Oracle Corporation’s US infrastructure, with no CDN or WAF identified and a single likely origin address observed. This is ordinary hosting infrastructure and offers limited protective mediation compared with a CDN-backed deployment; it is a mitigating technical context only and does not establish business legitimacy.

EVIDENCE

- The site is served from AS31898, ORACLE-BMC-31898 – Oracle Corporation, US.
- One resolved IP address was observed, with one likely origin IP and zero detected edge IPs.
- The site’s TLS certificate is DV-validated, issued by YR1, and expires on 2026-11-05.

Closing Assessment

Routine browsing and ordinary accommodation enquiries are proportionate; independent confirmation and payment protection should precede substantial prepayment or disclosure of sensitive information.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of destiny89.com.

- The request stayed on destiny89.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by websitewelcome.com, across 2 name servers. NOTED
- The registration is paid up to 2026-08-29. NOTED
- The earliest public archive of this site is from 2013-07-12. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about destiny89.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
