Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Vietnamese educational portal offering an extensive directory of online multiple-choice exercises and examination-preparation materials across university, professional, technical, legal, medical, and general-education disciplines, with an informational, audience-oriented business model.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, or other confirmed fraud indicators were observed. The site's long operating history, stable educational purpose, established traffic footprint, and clean external reputation converge strongly with its content profile. Interactive testing found no cloaking, wallet activity, clipboard interference, external password submission, or suspicious scripting; consequently, observed background requests and dynamic page changes do not establish a malicious pattern.

- The homepage presents approximately 69,942 characters of substantive quiz content covering areas such as medicine, engineering, information technology, law, economics, and professional certification.
- The domain was registered in 2016 and is approximately 9.6 years old; 40 archive snapshots span 2016–2026, representing 11 years of tracked history without detected repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-security warning, no confirmed threat listing, and 0 reported infrastructure-abuse incidents.
- Behavioral examination completed two successful runs and found no cloaking, suspicious inline scripts, wallet-provider activity, clipboard hijacking, or externally submitted passwords.

Regulatory Verification Notes

The observable service is an informational education and test-practice resource rather than a financial, investment, payment, or other evidently regulated offering. The supplied homepage does not establish a claimed license, regulatory authorization, or specific legal-entity identity; in this business context, that is a limited disclosure consideration rather than evidence of illegitimacy. The site's mid-level page authority and established traffic presence provide additional contextual support but do not substitute for legal disclosures.

- The homepage characterizes the service through educational quiz and exam-practice content and makes no investment solicitation, financial-return promise, or regulated-service claim.
- The site is served from AS149089 (CLOUDFLY-VN – CLOUDFLY CORPORATION, VN).
- The site's transport encryption uses a DV TLS certificate issued by YE1, valid until 2026-09-22.

- The evaluated page contained no sensitive form or credential request and was classified as an educational quiz directory.

What to Verify Next

Organizations considering formal reliance on the service should confirm the operator’s legal identity and official contact channels through independently obtained records. Academic or professional users should also validate the authorship, currency, and source quality of examination materials before treating them as authoritative for certification, clinical, legal, or technical decisions.

- The supplied content does not identify a verified legal operator or provide independently corroborated organizational particulars.
- The catalog includes specialist subjects—such as infectious diseases, pharmacology, food safety, cybersecurity, financial reporting, and construction certification—where outdated or unattributed material could affect learning outcomes.

Summary Verdict

The website presents as a legitimate, established, and trustworthy educational resource with a coherent operating history and no observed contradictory threat signals. Normal interaction, including account login and standard use where available, is appropriate.

Infrastructure Integrity

The service resolves directly to a single likely origin address in Vietnam and does not use a detected CDN or WAF. This straightforward hosting posture offers less edge-layer shielding than a CDN-backed deployment, but the identified infrastructure is stable, attributable to a named hosting provider, and unsupported by confirmed abuse evidence; infrastructure alone is not proof of legitimacy.

Closing Assessment

Prospective users may engage normally, while institutions relying on the material for consequential educational or professional decisions should complete routine operator and content-provenance due diligence.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dethitracnghiem.vn.

- The request stayed on dethitracnghiem.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2016-12-19. CLEAR
- It is hosted on CLOUDFLY-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dethitracnghiem.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
