Full analysis

Security Alert

Fortinet, Google, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

DextraCoin is an online trading and investment platform presenting CFD access across global markets and inviting visitors to create accounts, log in, and fund trading or investment activity.

Scam/Impersonation Risk

The site has a **critical scam and impersonation risk posture**. Confirmed blacklist status and corroborated malicious detections are decisive contradictions, even though the available evidence does not identify conflicting legal-entity names or establish direct brand impersonation. The homepage also combines deposit-before-service mechanics with guaranteed-return and aggressive high-yield investment-plan claims, while providing limited verifiable support for how those returns are generated. This combination materially increases the risk associated with credentials, account creation, deposits, and financial transactions.

EVIDENCE

- The homepage presents CFD trading, packaged investment plans, and deposit-funded participation with promised returns.
- The homepage contains login, sign-up, investment-purchase, and contact forms, including a sensitive interaction surface.
- External reputation checks recorded a confirmed blacklist status, a malicious safety classification, 12 malicious detections, and 2 suspicious detections.

Regulatory Verification Notes

The site provides navigation to “About Us,” “FAQ,” “Legal & Regulation,” and “Contact” pages, but the available evidence does not show a claimed licensing authority or license number for the brokerage activity. That is a material regulatory-transparency gap for a platform soliciting deposits and promoting investment returns. The domain registration record identifies NameSilo, LLC as registrar and “dextra dextra” as the recorded registrant, but this does not independently verify a regulated operating entity. No separate broker match was identified in the supplied third-party reputational dataset; that absence is not a licensing determination.

EVIDENCE

- The homepage menu includes “Legal & Regulation,” “About Us,” “FAQ,” and “Contact,” while the available business-model record shows no claimed license authority or license number.
- The domain was registered in 2025 and is approximately 0.9 years old; registrar: NameSilo, LLC.
- The site is hosted on AS47583, AS-HOSTINGER - Hostinger International Limited, CY.
- TLS is issued by YE2 at DV validation level and is valid to 2026-12-03T00:45:03+00:00.

What to Verify Next

Before any sensitive interaction, an independent party should confirm whether the operator and proposed CFD or investment services appear in the relevant financial-services regulator’s register, using the legal entity and license details obtained through an independently verified channel rather than relying solely on the website. Payment arrangements, withdrawal conditions, client-money protections, and the legal basis for advertised returns should be validated independently. Account creation, credential submission, deposits, and financial transactions should remain suspended unless those checks produce consistent, authoritative results.

EVIDENCE

- The homepage advertises deposits and investment plans before the underlying service or returns are delivered.
- The homepage makes client-fund-protection and trading-platform claims without corresponding verifiable evidence in the supplied page content.
- The homepage links to social profiles, but those links do not independently establish licensing or operator identity.

Summary Verdict

The website presents a **critical trust posture** with a decisive risk to sensitive interaction. The available evidence is not sufficient to support use for account access, credential submission, deposits, or other financial activity.

Infrastructure Integrity

The site resolved without a detected CDN or edge-IP layer; four addresses were identified as likely origin addresses, with no edge IPs reported. This infrastructure posture offers limited protective separation and should be treated only as a technical exposure observation, not as proof of malicious intent.

Closing Assessment

The appropriate enterprise disposition is to block sensitive interaction and escalate any existing engagement for security, fraud, and payment-review procedures.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dextracoin.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
