Full analysis

Overview

DFYTemplates is a sales and membership website offering downloadable private-label marketing templates, guides, bonuses, and related digital assets to online business owners through recurring membership or one-time purchase options.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent marketing-template business model, with no detected brand impersonation, phishing indicators, credential-harvesting forms, wallet activity, or other high-risk abuse pattern. Interaction testing did record some non-whitelisted external posts and substantial DOM changes, but these were not accompanied by hidden forms, password submissions, suspicious inline scripts, cloaking, clipboard activity, or cryptocurrency-drainer behavior; the available evidence therefore supports treating those signals as benign implementation activity rather than evidence of impersonation. A long-established registration record and continuous historical presence further support provenance consistent with an established site.

EVIDENCE

- The homepage presents a consistent “Done For You Marketing Templates” offering and contains no reported fraud red flags or impersonation indicators.
- The site’s interaction behavior completed 2 successful runs; it recorded 10 external posts, 2 non-whitelisted external posts, 731 maximum DOM differences, 0 wallet-connect runs, 0 hidden forms, and 0 password-external forms.
- The domain was registered on 2016-04-01 and is approximately 10.39 years old.
- Historical records contain 98 archive snapshots spanning 2016–2025, representing 10 years tracked.

Regulatory Verification Notes

The available evidence is consistent with a conventional digital-goods and subscription business rather than a financial-services operation. The homepage claims that its founders have more than 35 years of online marketing experience, offers monthly or lifetime access to private-label templates and marketing guides, includes testimonials and bonuses, and presents a 30-day money-back policy; these commercial claims and the identity of the operating entity are not independently verified. No regulated third-party status or licensing claim is established in the supplied material, so the principal regulatory consideration is disclosure transparency rather than an indication of misconduct. Registration privacy is an administrative detail, and the overall technical and reputational signals remain supportive.

EVIDENCE

- The site is registered through NAMECHEAD INC.
- Served from AS210250 operated by WPX - K Media Tech Ltd., BG.
- TLS uses issuer YE2 with DV validation and is valid through 2026-10-16.
- The homepage and terms-related navigation provide commercial-policy material, including pricing options and a 30-day refund policy.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the legal seller identified on the terms and privacy pages, the enforceability of the advertised refund process, and the payment method’s dispute and buyer-protection arrangements. Any relevant business-registration or consumer-protection status should be checked through the applicable official registry, and contact channels should be confirmed through an independent route rather than relying solely on page content.

EVIDENCE

- The terms page should be used to confirm the contracting entity, governing terms, renewal mechanics, and refund conditions.
- The privacy page should be reviewed for the responsible data controller and stated handling of account and payment information.
- The checkout and contact paths should be tested for consistency with the seller and payment-protection details stated in the legal pages.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture for its stated commercial purpose. The site's real-world operator identity remains independently unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by WPX - K Media Tech Ltd., BG, on AS210250; no CDN was detected, no edge IPs were identified, and two likely origin addresses were resolved. Valid DV TLS provides transport protection, while the hosting arrangement is a mitigating technical signal only and does not independently establish the operator's identity.

Closing Assessment

Ordinary independent seller-identity, refund-policy, and payment-protection checks should be completed before credentials or payment details are submitted.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dfytemplates.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
