

Is dg-pinya.com legit? TrustSniffer's high-trust assessment: 100/100

dg-pinya.com

Verdict

100

OUT OF 100

HIGH TRUST

dg-pinya.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

County institution compilation office site (正宁县机构编制委员会办公室) containing news, announcements, and administrative documentation. Contact address and phone number included; content focuses on governance and public service updates.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What dg-pinya.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as the online office of the Zhengning County Institutional Compilation Committee, publishing local government news, administrative notices, institutional information, policy updates, and public-service documentation rather than offering commercial or financial services.

Scam/Impersonation Risk

No scam, phishing, impersonation, or conflicting-identity indicators were observed. The homepage content is consistent with a public-sector information service, with material concerning administrative reform, personnel establishment management, oversight, and government affairs. The site does not present payment flows, cryptocurrency functions, advertising-led monetization, or sensitive login forms, and available external reputation checks recorded no malicious or suspicious detections. This supports a low scam/impersonation risk posture, although the operator’s real-world identity remains independently unverified.

EVIDENCE

- The homepage identifies the subject as a county-level institutional compilation office and contains government announcements, policy material, and administrative documentation.
- Page analysis recorded no red flags, no suspected brand impersonation, and no phishing indicators.
- The site's forms analysis found no login form, sensitive form, hidden form, or untrusted form destination.
- External checks recorded zero malicious detections, zero suspicious detections, and zero abuse reports.

Regulatory Verification Notes

The apparent business model is informational public service, with no financial transactions or regulated commercial activity apparent on the reviewed pages. The site does not claim a financial-services license or display a registration number; this is a transparency and verification point rather than evidence of deception. The homepage's browser title displays "5365.com," while the page body presents the Zhengning County government-office identity; this naming inconsistency should be reconciled as part of ordinary institutional verification. Available evidence supports an established, apparently legitimate website, but does not independently verify the real-world operator.

EVIDENCE

- The domain was registered on 2018-06-21 and is approximately 8.17 years old.
- Registration is through NameSilo, LLC, with expiry recorded as 2027-06-21.
- The homepage title is "5365.com," while the visible content identifies the Zhengning County Institutional Compilation Committee Office.
- The reviewed content describes public notices and administrative work, with no license claim or financial-service registration number shown.

What to Verify Next

Independent confirmation should be obtained from an authoritative county or provincial government directory that the website is an approved channel for the named office. The address and telephone details shown on the contact material should be confirmed through an independently sourced government contact route. If any future page requests credentials or payment, ordinary checks of the responsible entity, applicable service terms, return or dispute provisions, and payment protection should be completed before proceeding.

EVIDENCE

- The site's content includes a contact address and telephone number that can be checked through an independent public-sector source.
- The homepage is an informational publication site rather than an apparent transaction or account-service portal.
- No licensing or registration identifier is presented in the reviewed content, making independent institutional confirmation the appropriate next step.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate public-service website. No scam or impersonation contradictions were observed, but the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site resolves directly to hosting operated by PEG-LA - PEG TECH INC in the United States, without a detected CDN or WAF layer; this provides limited architectural concealment but is not, by itself, a negative legitimacy signal. Transport security is provided through a valid domain-validated TLS certificate, which supports secure delivery but does not establish operator identity.

EVIDENCE

- Served from AS398823, PEG-LA - PEG TECH INC, US.
- TLS certificate issued by YR1 with DV validation, valid to 2026-09-20.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.

Closing Assessment

Routine informational browsing is proportionate to the assessed posture; before any credential or payment interaction, standard independent identity and transaction-protection checks should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dg-pinya.com.

- The request stayed on dg-pinya.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2027-06-21. NOTED
- The earliest public archive of this site is from 2015-10-11. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dg-pinya.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
