## Full analysis

### Overview

This website is a localized DHL Slovakia customer-facing service page branded as DHL4YOU, presenting parcel-shipping assistance, customer-service contact details, shipment ordering, and payment by credit card or PayPal for a logistics-service business model.

### Scam/Impersonation Risk

The site's visible content is coherent with a DHL-branded logistics service and does not display a login form, credential-collection form, or overtly malicious interaction. However, the domain has a confirmed external blacklist hit, with additional external detections recording one malicious and one suspicious assessment. That reputation conflict is materially more significant than the benign appearance of the homepage. The DHL presentation should therefore be treated as an unverified brand claim rather than proof that the site is operated by DHL or Deutsche Post AG. No separate identity contradiction or confirmed brand-impersonation finding is established in the supplied evidence.

#### EVIDENCE

- Domain registration record: created 2021-04-23, age 5.33 years, expiring 2027-04-23; registrar: Key-Systems GmbH.
- Web-archive record: 246 snapshots from 2021-12-01 through 2026-05-19, spanning 6 years of tracked activity.
- External reputation telemetry records 1 malicious and 1 suspicious detection, alongside a confirmed external blacklist hit.

#### Regulatory Verification Notes

The homepage footer identifies “DHL International GmbH” and provides legal and privacy notices, but the available evidence does not independently verify that entity’s connection to the domain. No license, registration number, or regulatory authority is disclosed for the service; this is a transparency and verification gap rather than, by itself, evidence of fraud. The technical certificate and hosting records provide infrastructure facts, not legal proof of ownership or authorization.

#### EVIDENCE

- The homepage footer names DHL International GmbH and links to legal, privacy, and cookie disclosures; no license or registration number is shown in the captured content.
- Served from AS25248, BlueTone-AS - RADIOKOMUNIKACE a.s., CZ.
- TLS certificate issued by DPDHL Global TLS CA - I5, validation level OV, subject organization Deutsche Post AG, valid to 2027-02-16T19:14:46+00:00.
- The captured legal and service content contains one apparent legal-entity name and does not establish independent operator identity.

#### What to Verify Next

Before any account, shipment-payment, or other sensitive interaction, the domain should be confirmed through an independently sourced DHL corporate channel or an offline DHL customer-service route. The relevant Slovak business and regulatory registers should also be checked for the operating entity and any authorization required for the services offered. Until those checks reconcile the blacklist finding with the apparent DHL presentation, interaction should remain limited to non-sensitive viewing.

#### EVIDENCE

- The homepage provides DHL Slovakia customer-service contact details that can be compared with independently sourced corporate contact information.
- The legal footer supplies the stated entity name but does not provide an independently verifiable registration or licensing reference.

#### Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site presents a credible-looking corporate service interface, but the confirmed external reputation contradiction and unverified operator linkage prevent a trustworthy legitimacy conclusion.

Infrastructure Integrity

The domain resolves to a single likely origin address with no detected CDN or WAF layer. Direct hosting on the identified infrastructure does not itself indicate maliciousness, but it provides no meaningful edge-layer mitigation that would offset the adverse external reputation signal.

Closing Assessment

Sensitive actions should be deferred until the domain, operator, and service authorization have been independently confirmed through official channels.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about dhl4you.sk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
