

Is dhlecommerce.nl legit? TrustSniffer's high-trust assessment: 100/100

dhlecommerce.nl

Verdict

100

OUT OF 100

HIGH TRUST

dhlecommerce.nl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Official DHL eCommerce Benelux site content in Dutch: consumer and business parcel services, tracking, app, sustainability, careers and webshop integrations. Appears consistent with an established logistics provider and does not show indicators of phishing or financial fraud.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Dutch-language DHL eCommerce Benelux website presents consumer and business parcel-delivery services, including shipment creation, tracking, returns, delivery options, business integrations, sustainability information, careers, and customer support; its apparent business model is fee-based logistics and fulfilment services.

Scam/Impersonation Risk

No phishing, impersonation, financial-fraud, or other contradictory indicators were observed. The site's content is coherent with a corporate logistics provider, its navigation covers operational services such as tracking, shipping rates, returns, insured shipping, and business accounts, and its external reputation checks returned no malicious or suspicious detections. Behavioural inspection identified external requests and posts, but no cloaking, hidden forms, password-exfiltration forms, wallet activity, clipboard manipulation, or other abuse pattern; this is consistent with ordinary service integrations rather than an observed fraud mechanism.

EVIDENCE

- The Dutch homepage and service navigation describe DHL eCommerce consumer and business parcel services, tracking, returns, delivery points, sustainability, and webshop integration.
- The captured page contained no login form, hidden form, sensitive form, wallet connection, or wallet-drainer activity.
- The domain-registration record shows registration on 2018-11-29 and an age of approximately 7.7 years; the registrar is Key-Systems GmbH.

Regulatory Verification Notes

Available page content is consistent with an established logistics business, but the real-world operator identity is not independently verified by the supplied evidence. No financial or other sector-specific licence claim or registration number is presented in the analysed business-model material; for a parcel-delivery site, this is a regulatory-transparency item rather than evidence of a scam. The site's established traffic presence, clean external reputation, long registration continuity, and valid transport encryption materially support an apparently legitimate assessment, while not converting the site's own corporate presentation into proof of legal-entity identity.

EVIDENCE

- The site identifies itself through corporate/service material including “Over DHL,” customer service, careers, consumer services, and business services.
- The domain is served through AS13335 (Cloudflare, Inc.; CLOUDFLARENET).
- The site's TLS certificate is issued by WE1 with DV validation and is valid to 2026-09-18.
- External traffic measurement places the domain at rank 41802 and within the global top one million.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the legal merchant identity, applicable service terms, return or claims procedures, and available payment protections using official channels obtained independently of the immediate browsing session. Login or account actions should be initiated only from the independently confirmed official domain and associated applications.

EVIDENCE

- The homepage provides separate consumer and business pathways, including “Mijn DHL,” customer service, shipment creation, and business-account functions.
- The service navigation includes rates, returns, insured shipping, delivery-point information, and international shipping options.
- The analysed page exposed no sensitive form or untrusted form destination, so any later credential or payment prompt should be assessed as a separate interaction surface.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradictions were observed, although the operator identity remains likely rather than independently verified.

Infrastructure Integrity

Cloudflare CDN and WAF protection sit in front of the site, with all observed addresses identified as Cloudflare edge infrastructure and no origin candidate visible in the analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, not proof of legitimacy.

Closing Assessment

Routine browsing and ordinary service use align with the assessed posture; independent merchant-identity, terms, and payment-protection checks should precede credential submission or payment activity.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

LIKELY

Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dhlecommerce.nl.

- The request stayed on dhlecommerce.nl. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Key-Systems GmbH. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dhlecommerce.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
