Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

dhosting.pl is a Polish commercial web-hosting provider offering elastic hosting, domain registration, business email, website-building and migration services, customer support, and a partner programme; its apparent business model is subscription and add-on service sales to individuals and organisations.

Scam/Impersonation Risk

No phishing, impersonation, brand-conflict, or other contradictory signals were observed. The site's service model is coherent with a conventional hosting business, and external reputation checks returned no malicious or suspicious classification. Automated interaction did produce substantial page-structure changes, external requests and posts, and console errors on the homepage; however, these are implementation and behavioural observations rather than confirmed abuse indicators, particularly because no cloaking, hidden sensitive forms, wallet activity, or malicious scripts were detected. The available evidence therefore supports a low scam or impersonation risk, while the real-world operator identity remains not independently verified.

EVIDENCE

- The domain registration record shows registration on 2006-11-06 and an age of 19.78 years, with expiry on 2027-11-06.
- The commercial homepage is classified as a hosting, domain, and email-services site and contains no detected phishing or brand-impersonation indicators.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist result for the domain.
- Homepage interaction testing observed dynamic DOM changes and external network activity, but no hidden forms, wallet-drainer activity, clipboard hijacking, or cloaking.

Regulatory Verification Notes

The available content is consistent with an established commercial service provider, but it does not independently establish the real-world legal operator. No financial, investment, or other regulated-service claim is presented in the supplied material. A license or registration number is not claimed in the available site content; for this type of hosting business, that is best treated as a disclosure and applicability question rather than evidence of misconduct. The homepage does provide commercial terms context through product pricing, promotional offers, customer testimonials, and support or sales contact channels, but those materials do not substitute for independent entity verification.

EVIDENCE

- The homepage presents a commercial catalogue covering hosting, domains, business email, website creation, migration, and support services.
- The homepage contains checkout, contact, and login form functions, with no untrusted form destination or sensitive form redirection detected.
- The site is served from AS48896, DHOSTING-AS - dhosting.pl Sp. z o.o., PL.
- The transport certificate is a valid DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-09-12T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the contracting entity, applicable business registration details, service terms, renewal conditions, cancellation and refund provisions, and available payment-protection mechanisms. Where a regulated registration could be relevant to a particular service or jurisdiction, that applicability should be checked against the appropriate official registry. Official support and account-recovery channels should also be confirmed through an independently sourced route rather than relying solely on page links.

EVIDENCE

- The homepage offers paid subscriptions, domain registration, promotional pricing, and add-on services, making billing and renewal terms relevant to pre-engagement review.
- The homepage provides login and checkout functionality, making independent confirmation of the merchant and payment protections appropriate before submission of credentials or payment data.
- The site presents support and sales contact facilities on its commercial homepage, providing channels that can be cross-checked independently.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification is strong, but it should not be interpreted as proof of the operator's independently verified real-world identity.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by DHOSTING-AS - dhosting.pl Sp. z o.o. in Poland, with one identified IP and no detected CDN or WAF layer. This conventional direct-hosting arrangement provides a clear infrastructure association, although it offers less intermediary edge protection than a site deployed behind a mainstream CDN.

Closing Assessment

Proceeding is proportionate for ordinary service evaluation, subject to independent checks of the contracting entity, commercial terms, and payment protections before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dhosting.pl.

- The request stayed on dhosting.pl. It was not redirected to another domain. CLEAR
- Registration is published under dhosting.pl Sp. z o.o.. CLEAR
- DNS for this domain is served by dhosting.pl, across 2 name servers. NOTED
- The registration is paid up to 2027-11-06. CLEAR
- It is hosted on DHOSTING-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dhosting.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
