

Is dial-a-doctor.com.au legit? TrustSniffer's high-trust assessment: 80/100

dial-a-doctor.com.au

Verdict

80
OUT OF 100

HIGH TRUST

dial-a-doctor.com.au appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Local Perth after-hours medical service site offering bulk-billed home visits, telehealth and hotel/aged-care visits. Provides clear contact phone, address, booking instructions, operating hours and service descriptions.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://www.dial-a-doctor.com.au/>

What dial-a-doctor.com.au served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2012.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Dial-A-Doctor is a Perth after-hours healthcare service website presenting bulk-billed home visits, telehealth consultations, and visits to hotels and aged-care facilities, with booking and contact information for patients seeking urgent medical care outside regular general-practice hours.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or identity-contradiction signals were observed. The site's healthcare-service presentation is internally coherent: the homepage describes after-hours care, the booking flow, operating hours, and Medicare/DVA billing, while the contact and FAQ pathways support the same service model. The only adverse external signal was attributed to shared Amazon delivery infrastructure rather than specifically to the website, with zero confidence assigned to that attribution; it therefore does not materially change the low-risk assessment.

EVIDENCE

- The homepage and booking page present a healthcare service and a booking/contact form, with no login form, hidden sensitive form, or external password submission detected.
- Page analysis recorded no red flags and no suspected brand impersonation.
- External reputation checks recorded `vt\_malicious: 0`, `vt\_suspicious: 0`, `gsb\_malicious: false`, and `external\_blacklist: false`.
- Two abuse reports concern IP address `13.248.175.166`, identified as shared Amazon Technologies Inc. content-delivery infrastructure, with confidence score `0`.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate healthcare provider, but the real-world operator identity is not independently verified. The site provides substantive service information and identifies operational contact and booking routes; the registration record names DIAL A DOCTOR AUSTRALIA PTY LTD and lists GoDaddy.com LLC trading as GoDaddy.com as registrar. The site does not present a licensing authority or license number in the supplied content, so healthcare authorization, practitioner credentials, and Medicare/DVA billing arrangements remain matters for independent confirmation rather than conclusions about legitimacy. No matching broker-reputation entry was identified, although that contextual result is not a licensing or regulatory determination.

EVIDENCE

- The homepage, About Us, FAQ, Contact Us, and Privacy Policy pages are present; the homepage contains approximately 10,174 characters of service and operating information.
- Registration data lists GoDaddy.com LLC trading as GoDaddy.com as registrar and DIAL A DOCTOR AUSTRALIA PTY LTD as registrant.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-10-12.
- Confirmed technical hosting evidence identifies AS16509, Amazon.com, Inc., US.

What to Verify Next

Before credential or payment interactions, an independent check should confirm that the named Australian business and the relevant practitioners are authorized to provide the advertised services, and that Medicare/DVA billing claims correspond to the actual appointment pathway. Contact details should be confirmed through an independently sourced channel, and the privacy, cancellation, billing, and payment-protection terms should be reviewed before submitting personal or financial information.

EVIDENCE

- The homepage provides a telephone booking route, online booking instructions, operating hours, and service descriptions that can be cross-checked independently.
- The site contains a dedicated Contact Us page and a Privacy Policy page.
- The booking interface is classified as a booking/contact form rather than a sensitive credential-collection form.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a high-trust, low-risk posture. No contradictory scam or impersonation indicators were observed, although the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement using Amazon infrastructure; observed edge addresses are served through AS14618, Amazon-AES, and the origin server address was not observable in the analysis. This provides a meaningful exposure-mitigation benefit, but it is infrastructure protection rather than proof of the operator’s identity or regulatory status.

EVIDENCE

- CDN/WAF edge infrastructure: AS14618, Amazon-AES - Amazon.com, Inc., US.
- Observed edge IPs: `100.24.208.97` and `35.172.94.1`; unique edge IP count `2`, likely origin IP count `0`.
- Confirmed transport certificate: issuer `YR2`, validation level `DV`, valid to `2026-10-12T05:44:24+00:00`.

Closing Assessment

The site is suitable for ordinary service research and booking consideration, subject to standard independent checks of business identity, healthcare authorization, privacy handling, and payment protections before sensitive interactions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 13.248.175.166 (Amazon Technologies Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dial-a-doctor.com.au.

- The request stayed on dial-a-doctor.com.au. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com LLC trading as GoDaddy.com. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2012-03-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dial-a-doctor.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
