Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Diario Correo is an established Peruvian digital news publisher presenting national, regional, political, international, sports, economic, entertainment, health, and video coverage. Its apparent business model is advertising- and subscription-supported journalism, supplemented by audience-consent partnerships and potentially promoted content.

Scam/Impersonation Risk

No contradictions were observed: the assessed pages showed no phishing indicators, brand impersonation, malicious reputation findings, suspicious forms, or financial solicitations. The homepage presents a substantial, topical news operation under the Diario Correo name, with editorial bylines, regional editions, search, video content, and links to terms, privacy, and cookie policies. The available historical record is consistent with continuity rather than recent repurposing, supporting an apparently legitimate site while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage contains extensive Peruvian and regional news coverage, editorial bylines, section navigation, regional offices, and no login or payment form.
- The domain was registered approximately in 2010 and is approximately 15.39 years old.
- The archive contains 5,000 snapshots spanning 2011–2021, covering 11 tracked years with a maximum gap of 1 year.
- External checks recorded 0 malicious and 0 suspicious detections, with no Google Safe Browsing malicious finding and no external blacklist finding.

Regulatory Verification Notes

The site operates as a news and media publisher rather than presenting a regulated financial service. Its visible legal framework includes terms and conditions, privacy, and cookie-policy pages, while the homepage provides contact and editorial details. The available evidence is consistent with an established, apparently legitimate publisher, but the real-world operator identity remains independently unverified; the registrar record names PRENSMART S.A.C. and should be treated as an identification lead rather than conclusive proof of operating control. No licensing claim or license number is presented, which is a transparency point for confirmation if a particular subscription, promoted-content arrangement, or commercial service creates a regulated obligation.

The consent notice and advertising ecosystem explain the presence of external traffic and partner requests; those observations do not, by themselves, indicate fraud.

EVIDENCE

- The domain is registered through NIC.PE, with PRENSMART S.A.C. recorded as the owner.
- The site is served through AS20940, identified as AKAMAI-ASN1 – Akamai International B.V., NL.
- The site's transport encryption uses a DV certificate issued by YR1, valid to 2026-08-31T14:12:35+00:00.
- The homepage displays terms, privacy, cookie-policy, contact, and editorial information, alongside a consent-management notice listing multiple partners.

What to Verify Next

Before credential or payment interactions, independently confirm that the publisher name and operating entity correspond through an appropriate corporate or media-sector source, and review the applicable subscription terms, cancellation provisions, refund treatment, and payment protections. For any promoted content or commercial opportunity presented through the site, validate the advertiser or counterparty independently rather than relying solely on the publication context. Contact details should also be confirmed through an independent channel before sensitive account or payment matters are discussed.

EVIDENCE

- The homepage identifies the publication as Diario Correo and provides editorial and regional-office references that can be compared with independent records.
- The site's terms, privacy, and cookie pages provide the appropriate documents for checking service conditions and data-use practices.
- The business model is described as advertising- and subscription-supported, with audience-data and consent partners and possible promoted content.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary browsing and standard interaction. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge endpoints rather than identified origin candidates. This provides a meaningful exposure-mitigation layer, but protective infrastructure is treated as a security control rather than proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, with independent merchant-identity, service-term, and payment-protection checks appropriate before credentials or payments are provided.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of diariocorreio.pe.

- The request stayed on diariocorreio.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2011-03-24. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about diariocorreo.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
