- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Diário da Região is a regional Brazilian news and media website presenting reporting on cities, politics, economy, culture, sports, classifieds, opinion, and related editorial content. Its apparent business model is that of a local publisher supported by advertising, sponsored content, classifieds, and reader subscriptions, including a homepage offer starting at R\$5 per month.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents ordinary editorial content and subscription prompts rather than investment offers, custodial services, wallet connections, or credential-harvesting forms. Behavioral inspection recorded two suspicious inline scripts, but the same capture found no hidden forms, password submissions, wallet activity, clipboard manipulation, or cloaking; this is therefore a limited technical observation rather than evidence of impersonation or fraud. The site's long registration continuity, substantial archival presence, clean external reputation, and established traffic footprint support an apparently legitimate and established website, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage contains regional news articles, navigation for cities, politics, economy, culture, sports, classifieds, and opinion, with no investment solicitation or login form visible.
- The domain was registered in 1998 and is approximately 27.75 years old; the registration record names EMPRESA DE PUBLICIDADE RIO PRETO LTDA.
- The web archive records 5,000 snapshots spanning 2000–2019, across 20 tracked years.
- External checks recorded zero malicious and zero suspicious results, no Google Safe Browsing malicious finding, no blacklist finding, and no reported abuse activity.

Regulatory Verification Notes

The captured site presents itself as a news publisher rather than a financial or investment service, so no financial licence claim is expected from the visible business model. The homepage does not provide a clear licensing or formal registration disclosure in the captured content; this is a limited transparency point for confirming the publisher's legal and commercial arrangements, not evidence of a scam. The available evidence is consistent with an established site, but it does not independently prove that the website's editorial, subscription, and contact operations are controlled by the named registration holder.

EVIDENCE

- The homepage identifies a news and media operation with subscription, advertising, classifieds, and sponsored-content monetization rather than regulated financial services.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid until 2026-09-29T05:33:35+00:00.
- The site is served by CLOUDFLARENET - Cloudflare, Inc., US, using AS13335.
- No matching third-party broker record was identified in the available reputational context.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the publisher's legal identity, subscription terms, cancellation and refund provisions, and the payment-protection arrangements offered by the subscription channel. Official contact details should be confirmed through an independent, offline or previously trusted route, particularly before resolving account or billing issues. If any separate page later promotes financial products, investment services, or regulated activities, the relevant legal entity and licence should then be checked against the applicable public registry.

EVIDENCE

- The homepage displays a paid subscription call to action and should be used to identify the applicable billing, cancellation, and renewal terms.
- The homepage provides contact prompts and telephone details that can be cross-checked independently before sensitive account or payment discussions.
- The captured page contains no credential-collection form, financial-investment offer, or custodial-service workflow requiring immediate escalation.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established, apparently legitimate news website and no observed contradiction suggesting phishing, impersonation, or scam activity. The principal qualification is that the real-world operator identity has not been independently verified, so the trust conclusion should not be treated as proof of ultimate ownership or control.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, and all observed addresses were CDN edge infrastructure rather than an exposed origin server. This reduces direct origin exposure and is a mitigating security feature, although protective hosting infrastructure alone does not establish legitimacy.

EVIDENCE

- Observed edge infrastructure includes 104.26.4.80, 104.26.5.80, 172.67.69.121, and 2606:4700:20::681a:450, all associated with AS13335.
- The infrastructure provider is CLOUDFLARENET - Cloudflare, Inc., US.
- Six observed IP addresses were identified as CDN edges, with zero likely origin IP addresses.

Closing Assessment

Normal informational browsing is proportionate to the evidence. Account or subscription activity may proceed subject to the ordinary independent identity, terms, and payment-protection checks appropriate for any online publisher.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of diariodaregiao.com.br.

- The request stayed on diariodaregiao.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2035-11-17. CLEAR
- The earliest public archive of this site is from 2000-03-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about diariodaregiao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
