## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

Diario de Pernambuco is an established Portuguese-language regional news portal presenting coverage of politics, elections, Pernambuco and local affairs, economy, sports, culture, technology and public safety. Its apparent business model is that of a commercial publisher supported by advertising, digital access or subscriptions, classifieds and sponsored content, with the homepage positioning the publication as “Conectando gerações desde 1825.”

### Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist or malicious-reputation indicators. The homepage has no login or sensitive-data form, and no wallet, clipboard-hijacking or cloaking behavior was detected. Repeated hidden form elements and substantial page changes after interaction are behavioral anomalies, but the absence of password-external forms and the site's conventional editorial presentation make them more consistent with publisher, advertising or analytics functionality than with a confirmed abuse pattern. The overall evidence therefore supports a low scam or impersonation concern, while the real-world operator identity remains likely rather than independently proven.

#### EVIDENCE

- The homepage is classified as a news/media page with no login form, no sensitive form and no untrusted form destination.
- Behavioral inspection detected hidden form elements and post-interaction DOM changes, but recorded 0 wallet-connect runs, 0 wallet-sensitive runs, 0 wallet-drainer runs, 0 clipboard writes and a cloaking classification of “none.”
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist result.

#### Regulatory Verification Notes

The site presents a publisher identity and a coherent editorial business model, but the supplied page content does not show a regulatory license or registration number. That is a disclosure and verification point rather than evidence of a scam, particularly because the service is presented as journalism rather than as a regulated financial product. A registration record identifies *Diario de Pernambuco S/A.*; however, the available evidence supports only a likely connection to the real-world entity, not independently verified operator identity. A broker-focused third-party dataset returned no match, which is contextual reputational information and not a licensing or regulatory determination.

#### EVIDENCE

- The domain registration record shows creation on 2003-01-20 and an identified registrant of *Diario de Pernambuco S/A.*
- The domain is 23.59 years old, based on the registration record.
- Historical coverage comprises 5,000 archive snapshots spanning 2000–2022, with 23 years tracked.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-09-26T06:13:46+00:00.

#### What to Verify Next

Before credential or payment interactions, an institution should independently confirm that the publisher identity used for any subscription or commercial transaction corresponds to the intended corporate entity. Subscription, cancellation, refund and payment-protection terms should be reviewed on the relevant transaction flow, and official contact channels should be confirmed through an independent route rather than relying solely on information presented within a single browser session.

#### EVIDENCE

- The homepage exposes editorial sections, social links and subscription-related navigation, providing specific channels for independent cross-checking.
- The available analysis identifies the operator connection as likely rather than independently verified.
- The business model includes advertising, digital access, classifieds and sponsored content, so transaction-specific terms should be assessed separately from the news content.

Summary Verdict

The overall posture is **high trust and low risk**, and the website is apparently legitimate and consistent with an established publishing operation. The evidence converges on a coherent, mature and non-contradictory service, although the operator’s real-world identity should remain qualified as likely rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF infrastructure and is served through AS13335, CLOUDFLARENET – Cloudflare, Inc., US. Observed addresses were CDN edge servers rather than exposed origin infrastructure; this reduces direct origin exposure and is a mitigating security control, not proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, with independent publisher-identity, subscription-term and payment-protection checks completed before credentials or payments are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 79/100 |
| Identity verification confidence | 78%    |

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of diariodepernambuco.com.br.

- The request stayed on diariodepernambuco.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-20. NOTED
- The earliest public archive of this site is from 2000-05-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about [diariodepernambuco.com.br](https://diariodepernambuco.com.br) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
