

Is dicionariodenomesproprios.com.br legit? TrustSniffer's high-trust assessment: 95/100

dicionariodenomesproprios.com.br

Verdict

95

OUT OF 100

HIGH TRUST

dicionariodenomesproprios.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Portuguese-language dictionary of given names with meanings, origins, featured names, category listings and editorial articles. Site uses a consent management platform and many advertising/tracking vendors.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is a Portuguese-language informational reference portal titled “Significado dos Nomes – Dicionário de Nomes Próprios,” presenting meanings, origins, categories, featured names, Brazilian naming trends, baby-name guidance, and related editorial content. Its apparent business model is advertising-supported publishing, with display advertising, third-party tracking, consent management, and possible affiliate activity rather than financial services or commerce.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent dictionary and editorial purpose, with no detected brand impersonation, phishing indicators, malicious reputation findings, or sensitive login and payment forms. The content and observed interaction model are consistent with a low-risk informational website; advertising and consent-management activity is commercially relevant but does not, on the supplied evidence, indicate impersonation or scam behavior.

EVIDENCE

- The homepage identifies itself as a dictionary of proper names and provides meanings, origins, name categories, featured names, and editorial articles.
- The homepage contains no login form, hidden sensitive form, password-external submission, wallet interaction, or detected brand-impersonation signal.
- Domain registration record: registered 2008-05-07, approximately 18.27 years old, with expiration on 2028-05-07.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate content website, but the real-world operator identity is not independently verified. The registration record names Adriano Guimaraes Frazao; that record alone does not establish that the named individual operates the website. The site is not presented as a regulated financial service, and no licensing claim or license number is identified, so regulatory verification is primarily a transparency consideration if the site later introduces paid, account-based, or otherwise regulated functionality. A separate broker-reputation dataset produced no match, which is contextual support rather than a legal or licensing determination.

EVIDENCE

- The homepage is classified as informational/reference content with a low content-risk profile and no listed red flags.
- The site's transport encryption uses a DV certificate issued by YE1, valid to 2026-09-26T03:50:26+00:00.
- The homepage uses consent management for advertising and tracking vendors and contains one consent-management form rather than a sensitive transaction form.

What to Verify Next

Before any credential or payment interaction is introduced, independently confirm the operator's identity, review the applicable privacy, terms, and refund or cancellation provisions, and ensure that any payment method provides appropriate protection. If the site begins offering regulated services, confirm the relevant license directly with the competent registry rather than relying solely on site claims. Official contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage describes an advertising-supported publishing model rather than a regulated financial or transactional service.
- The observed form is limited to consent management; no sensitive form or untrusted form destination was detected.
- The available business-model assessment identifies no licensing claim or license number.

Summary Verdict

The overall posture is high trust and low risk, with evidence consistent with an established, apparently legitimate informational website and no observed scam, phishing, impersonation, or other contradictory signals. The principal qualification is that the real-world operator identity remains unverified, so the trust conclusion should not be treated as proof of operator identity.

Infrastructure Integrity

The site benefits from CDN/WAF protection, which is a mitigating control against direct exposure and common web-abuse patterns but is not, by itself, proof of legitimacy. Hosting telemetry identifies OVH - OVH SAS, FR on AS16276; the observed address set consisted of CDN edge infrastructure, with no origin candidate identified.

EVIDENCE

- Hosted on AS16276, operated by OVH - OVH SAS, FR; registry recorded as ARIN and hosting country as Canada.
- Two observed edge addresses were associated with the CDN/WAF layer, and zero likely origin addresses were identified.

Closing Assessment

Ordinary browsing and use are proportionate to the assessed posture. Any future credential or payment activity should follow standard independent checks of the counterparty, contractual terms, and payment protections.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dicionariodenomesproprios.com.br.

- The request stayed on dicionariodenomesproprios.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-63.org, across 4 name servers. NOTED
- The registration is paid up to 2028-05-07. CLEAR
- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dicionariodenomesproprios.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
