

Is dienthoaivui.com.vn legit? TrustSniffer's high-trust assessment: 100/100

dienthoaivui.com.vn

Verdict

100

OUT OF 100

HIGH TRUST

dienthoaivui.com.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Vietnamese homepage for Điện Thoại Vui, a multi-location electronics repair and retail business offering device repairs, used phones and laptops, components, accessories, trade-ins, promotions, and service booking. It displays a registered company identity, tax and business-registration number, office address, customer-service phone number, and email address.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the Vietnamese online presence of Điện Thoại Vui, a multi-location electronics repair and retail business offering device repairs, used phones and laptops, replacement components, accessories, trade-ins, promotions, and service booking.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other fraud signals were observed. The homepage presents a coherent commercial model, including repair services for phones, laptops, MacBooks, tablets, AirPods, and Apple Watches, alongside used-device sales and trade-ins. Its advertised prices and promotions—such as iPhone screen replacement from VND 500,000, camera replacement from VND 150,000, and discounts of up to 50% on used iPhones—are consistent with an electronics service and retail operation rather than an anomalous or deceptive proposition.

- The domain dates to 2017 and is approximately 9.17 years old; 361 archive snapshots span 31 May 2017 to 16 July 2026, covering 10 tracked years with no detected suspicious repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing threat finding, no external threat-list hit, and no reported abuse associated with the assessed infrastructure.
- The homepage showed no hidden forms, external password forms, cloaking, wallet-related behavior, clipboard manipulation, or suspicious inline scripts.
- The homepage explicitly identifies itself as an electronics repair and retail operation and contains no detected brand-impersonation indicators.

Regulatory Verification Notes

The homepage displays a registered company identity, tax and business-registration information, an office address, a customer-service telephone number, and an email contact. These disclosures provide substantive identity and accountability signals. No licensing claim was identified, but the presented activity is ordinary electronics repair and retail rather than a financial or otherwise purportedly regulated service; consequently, the absence of a financial-services license is not adverse. No matching broker-reputation record was found, which has no material bearing on this business category.

- The homepage attributes the operation to a named joint-stock company and publishes corporate registration and tax details together with a physical office address.
- The site's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid until 17 October 2026.

- The confirmed serving endpoint is AS140666, operated by ADPL-AS-AP / ANY DIGITAL PTE. LTD., with the observed server located in the United States.
- The homepage provides ordinary retail functions including account access, a shopping cart, repair booking, and location-oriented service navigation.

What to Verify Next

Before a material purchase or repair handover, the applicable branch, quoted price, warranty terms, replacement-part specification, turnaround time, and trade-in valuation should be confirmed through the business’s published channels. Transaction records should retain the quotation, service order, device-condition report, and payment receipt so that any later warranty or service dispute can be reconciled against documented terms.

- The homepage advertises a network of more than 30 repair centres, making branch-specific confirmation relevant to fulfilment.
- Several homepage offers use “from” pricing, indicating that the final charge may depend on the device model and required work.
- The homepage promotes home collection or delivery, creating a practical need to document device custody and condition.
- The site offers both repair services and used-device transactions, for which warranty scope and product condition may differ.

Summary Verdict

The website is a legitimate, established, and trustworthy commercial presence. Its coherent corporate identity, sustained operating history, clean external reputation, and consistent retail content support high confidence in normal interaction, including account login and standard use.

Infrastructure Integrity

The website uses Cloudflare CDN/WAF protection, and all six observed addresses were edge servers rather than origin candidates. Traffic was also observed across Zenlayer infrastructure, including AS21859; this layered edge posture reduces direct exposure of the origin environment but is a security-control signal rather than independent proof of legitimacy.

Closing Assessment

Prospective customers may use the website normally, while applying standard retail diligence by retaining transaction and service documentation for significant purchases or repairs.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dienthoaivui.com.vn.

- The request stayed on dienthoaivui.com.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2017-05-31. CLEAR
- It is hosted on ADPL-AS-AP, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dienthoaivui.com.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
