Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The Diia website is a Ukrainian government services portal presenting online citizen and business services, including electronic documents, e-signatures, registrations, grants, recovery programs, licenses, benefits, and related public-service applications. Its apparent purpose is to allow individuals and organizations to authenticate and complete official administrative processes online.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed. The homepage presents a coherent government-services model rather than soliciting investment returns or payments, and its login, application-submission, and e-signature functions are consistent with that purpose. A behavioral review did detect hidden form elements, but no password submissions to external destinations, wallet activity, suspicious scripts, cloaking, or untrusted form destinations were identified; in this context, the finding is compatible with interactive public-service workflows rather than a demonstrated fraud mechanism.

EVIDENCE

- The homepage identifies the service as “Державні послуги онлайн | Дія” and provides citizen and business services, authentication, applications, and e-signature functionality.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist result.
- The domain was registered on 2019-09-18 and is approximately 6.9 years old.
- Behavioral testing recorded two successful runs, six external XHR requests with zero non-whitelisted requests, zero wallet or drainer activity, and zero suspicious inline scripts.

Regulatory Verification Notes

Available evidence is consistent with an established government-services website, but the real-world operator identity is not independently verified by this assessment. The site presents an institutional identity through its Ukrainian government domain and service scope; this is an apparent identity signal, not proof of the legal entity operating every underlying service. No separate financial, investment, or broker licensing claim is relevant to the stated public-service model, and no third-party broker match was identified. The principal regulatory consideration is therefore ordinary confirmation that the service being accessed and any requested administrative process correspond to the intended official institution.

EVIDENCE

- The homepage is categorized as a government and public-services portal and lists business registration, licenses and permits, grants, benefits, documents, and e-signature services.
- The domain uses the sovereign “gov.ua” suffix and is classified in the government category.
- Hosting is identified as AS212542, DIIA-AS - SE Diia, UA; the registry is RIPE NCC and the hosting country is Ukraine.
- The site's TLS certificate is issued by GoGetSSL RSA DV CA, uses DV validation, and is valid through 2027-02-16.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm that the intended service is reached through the official government channel and that the specific application or transaction is expected. Any request for fees, personal information, electronic-signature material, or document uploads should be checked against the relevant official service description and applicable government instructions. For higher-impact actions, contact channels should be confirmed through an independently obtained government source rather than relying solely on page-provided navigation.

EVIDENCE

- The homepage includes login, application-submission, and e-signature-upload forms, making service and request-scope confirmation material before sensitive actions.
- The site states that cookies support sessions, authorization, and form completion, indicating that authentication is part of normal portal operation.
- The stated business model is public-service delivery and does not include investment-return solicitation.
- No suspicious form destination or externally submitted password form was detected during interaction testing.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate government-services website. No contradictions were observed, although the operator's real-world identity remains independently unverified; the classification should therefore be understood as strong evidence of site legitimacy rather than proof of operator identity.

Infrastructure Integrity

The site resolves directly to infrastructure identified with DIIA-AS - SE Diia in Ukraine, without a detected CDN or edge-IP layer. Its valid mainstream TLS deployment provides transport protection, while the hosting arrangement should be viewed as a mitigating technical signal rather than independent proof of legitimacy.

Closing Assessment

Normal public-service use is proportionate to the assessment, with ordinary independent confirmation of the intended service and payment-protection conditions appropriate before sensitive or financially consequential actions.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of diia.gov.ua.

- The request stayed on diia.gov.ua. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-50.org, across 4 name servers. NOTED
- The registration is paid up to 2026-09-18. NOTED
- It is hosted on DIIA-AS, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about diia.gov.ua at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
