What dionarenee.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2006.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Northeast Florida photography portfolio and booking service presenting portraits, senior sessions, boudoir, weddings, elopements, motherhood, newborn photography, client testimonials, and journal content, with an apparent business model based on commissioned photography sessions and event bookings.

Scam/Impersonation Risk

The site's visible content presents as a local photographer's service business, and the reviewed pages contain no apparent login form, hidden form, wallet functionality, suspicious script, or brand-impersonation indicator. However, this benign presentation is materially contradicted by confirmed external threat detections: the domain is **blacklisted**, with malicious classifications reported by multiple sources, including 11 malicious detections and one suspicious detection in the evaluated reputation results. The available evidence therefore supports a high-risk posture for sensitive interaction despite the ordinary photography presentation. No conflicting legal-entity names or direct brand-impersonation indicators were observed.

EVIDENCE

- Homepage: presents photography services for portraits, seniors, boudoir, weddings, motherhood, and birth-to-baby sessions; page analysis identified no content red flags.
- Homepage behavior: no login form, hidden form, wallet connection, clipboard manipulation, suspicious inline script, or cloaking was detected.
- External reputation evidence: 11 malicious detections, 1 suspicious detection, and confirmed blacklist status; Fortinet and Sophos were among the flagged vendors.
- Domain registration record: registered through GoDaddy.com, LLC on 2017-09-15 and approximately 8.93 years old.

Regulatory Verification Notes

The site's apparent service model is photography rather than a financial or otherwise visibly regulated offering. The reviewed material identifies the photographer by a personal name and describes photography services, but the available evidence does not independently verify the operator's real-world identity. No license, registration number, or regulatory authority is disclosed in the supplied site content; for this type of local service, that is a transparency and verification point rather than proof of wrongdoing. The confirmed blacklist status remains the dominant concern and should not be offset by the site's professional presentation or technical availability.

EVIDENCE

- About and homepage content: identifies "Diona" as the photographer and describes the business as serving women, families, and love stories throughout northeast Florida and beyond.
- Site business-model evidence: categorizes the website as a local photography portfolio and booking service with no claimed license authority or license number.
- Archive provenance: 74 recorded snapshots spanning 2006–2026, covering 21 years of tracked history; the historical material showed no confirmed suspicious repurposing or semantic business-model drift.
- Transport encryption: TLS is valid, uses DV validation, is issued by WE1, and expires on 2026-11-19.

What to Verify Next

Before any payment, booking commitment, or submission of personal information, independently confirm the photographer's identity, business details, service terms, cancellation and refund conditions, and the intended payment recipient. Any relevant local business or professional registration should be checked through the applicable official registry, and contact channels should be confirmed through an independent route rather than relying solely on the website. Given the confirmed blacklist status, sensitive interaction should remain suspended unless the external detections are conclusively resolved and the operator is independently authenticated.

EVIDENCE

- Contact and inquiry content: offers contact and booking pathways for commissioned photography services.
- Service content: describes portraits, weddings, boudoir, senior, motherhood, and newborn-related sessions, creating a potential payment and personal-information exposure.
- Identity evidence: independent identity verification is currently unverified.
- External reputation evidence: confirmed blacklist status and multiple malicious classifications require resolution before sensitive use.

Summary Verdict

The website has a credible-looking local photography presentation but an **unacceptable trust posture for sensitive interaction** because confirmed external malicious detections and blacklist status materially contradict the benign page content. The operator's real-world identity is also not independently verified, so the site should not be treated as established or authenticated on the strength of its presentation alone.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF infrastructure, which is a mitigating control against direct exposure of the hosting environment but does not establish legitimacy or neutralize the external reputation findings. All observed addresses were CDN edge addresses, and the origin was not observable in this analysis.

Closing Assessment

Prospective users should avoid login, credential submission, payment, and booking actions until the blacklist findings are independently resolved and the service operator is authenticated through trusted external channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dionarenee.com.

- The request stayed on dionarenee.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-15. NOTED
- The earliest public archive of this site is from 2006-12-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dionarenee.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
