

Is directv.com.co legit? TrustSniffer's high-trust assessment: 95/100

directv.com.co

Verdict

95

OUT OF 100

HIGH TRUST

directv.com.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language DIRECTV Colombia homepage advertising satellite and online television, mobile service, streaming bundles, premium content, subscriber benefits, payments, account access, and customer support. It shows concrete monthly prices and promotional terms and includes privacy, contractual, ethics, and contact resources.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is DIRECTV Colombia's telecommunications and entertainment service portal, presenting satellite and online television, mobile-telephony, streaming, premium-content, payment, account-management, and customer-support services under a recurring-subscription business model.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The corporate service presentation is consistent across the homepage, account-access routes, commercial offers, and customer-service resources. Its long-established domain and substantial historical record further support continuity rather than recent opportunistic use or suspicious repurposing.

- The domain was registered on 30 July 1998 and is approximately 28.03 years old; registration is maintained through CSC Corporate Domains, Inc.
- The web archive records 237 snapshots from 6 December 2000 through 12 December 2024, spanning 25 tracked years, with no established semantic repurposing.
- The homepage identifies DIRECTV Colombia and presents coherent sales, payments, recharges, customer assistance, DGO access, and MiDIRECTV account functions.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no external reputation-list hit, and no reported infrastructure abuse.

Regulatory Verification Notes

The homepage provides privacy, contractual, ethics, contact, and user-information resources, indicating a developed corporate disclosure framework. The supplied page content does not state a specific operating licence, licensing authority, or registration number; this is a limited verification note rather than evidence of illegitimacy. No contradictory legal-entity names or adverse broker-reputation match were identified.

- The homepage exposes privacy, contractual, ethics, PQR, contact, and general user-information resources.
- The supplied homepage contains no express licence claim, named licensing authority, or licence number.
- The site uses an organization-validated TLS certificate issued by Sectigo Public Server Authentication CA OV R36 to DIRECTV Latin America, valid until 20 October 2026.
- The hosting endpoint is served from AS25773, operated by RADWARE-CLOUD-SERVICES / RADWARE INC. in the United States.

What to Verify Next

For regulated procurement or material contractual onboarding, the contracting entity should be matched to the applicable corporate and telecommunications registries, and current promotion terms should be reconciled with the final service contract. Official support and payment channels should be confirmed through the contact resources published within the portal before operational integration.

- The homepage advertises Plata HD with 187 channels at COP 66,950 per month following a displayed prior price of COP 158,900, with a four-month discount.
- The homepage advertises Oro HD with 217 channels at COP 71,950 per month following a displayed prior price of COP 168,900, with a four-month discount.
- The TV Flex 1 offer includes 24 channels, Prime Video, DGO, Skeelo, and one selectable streaming platform at COP 58,450 per month during the stated promotional period.
- The homepage provides distinct sales, existing-customer, mobile-service, payments, recharge, PQR, and account-management routes suitable for independent channel confirmation.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate service portal. Its identity, historical continuity, commercial content, transport security, and clean external reputation converge without contradictory risk signals. Normal interaction, including account login, account actions, and standard transactions, is appropriate.

Infrastructure Integrity

The site resolves to a single likely origin address on Radware-operated infrastructure rather than presenting a separately identified CDN edge layer. The stable resolution, valid organization-validated encryption, and recognized enterprise hosting environment mitigate routine transport and availability risk, although infrastructure protection alone is not treated as proof of legitimacy.

Closing Assessment

Prospective customers may use the portal normally, while institutional onboarding should follow standard counterparty validation and contract-review controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about directv.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
