Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established New Zealand-focused provider of domain registration, renewal and transfer services, web and email hosting, SSL certificates, web security, SEO services, and related online-business support, operating through initial purchases and recurring service subscriptions.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or other contradictory signals were observed. The site's conventional commercial presentation aligns with its long operating history: the homepage provides coherent service navigation, support pathways, account access, and legal-policy links, while tested interactions showed no cloaking, hidden forms, suspicious scripts, clipboard interference, or credential forwarding to external forms. Its established traffic footprint and clean external reputation further support the conclusion that this is the legitimate Discount Domains NZ service rather than a deceptive copy.

- Domain-registration records show that the domain was registered in 2002 and is approximately 24 years old.
- Web archives contain 793 snapshots from 2002-11-23 through 2026-06-17, spanning 25 tracked years, with no suspicious repurposing detected.
- The homepage presented no sensitive form, hidden form, brand-impersonation indicator, or deceptive financial or cryptocurrency claim.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no reported hosting-IP abuse, and a global traffic rank of 60,737.

Regulatory Verification Notes

The homepage links to an About Us page, Privacy Policy, Terms of Use, Terms of Service, abuse-reporting channel, and contact page, providing the expected policy framework for a mature online-services business. The supplied page content does not make a financial-services, investment, or broker-licensing claim; consequently, there is no observed regulated-financial representation requiring reconciliation with a named authority. The available material does not establish the full contracting legal-entity name or corporate registration particulars, so those details should be taken from the applicable terms presented during contracting rather than inferred from the brand name.

- The homepage footer links to About Us, Privacy Policy, Terms of Use, Terms of Service, Do Not Sell or Share My Personal Information, Report Abuse, and Contact Us pages.
- The homepage describes a domain-registration and hosting business and makes no claim to hold a financial-services or brokerage licence.

- Domain-registration records name Dreamscape Networks International Pte Ltd trading as Crazy Domains as the registrar.
- The site publishes a New Zealand telephone number and provides dedicated support-request and network-status pathways.

What to Verify Next

For enterprise procurement, the contracting entity, governing terms, renewal schedule, cancellation provisions, and data-handling commitments should be matched to the purchase documentation. Service-specific controls—particularly domain-transfer authorization, administrative account recovery, DNS change protection, and escalation procedures—should be confirmed before placing business-critical domains under management. Official support channels should also be independently recorded for incident-response use.

- The homepage exposes separate workflows for domain registration, renewal, transfer, pricing, and payment options, making transaction-specific terms relevant to procurement review.
- Account Login and Webmail are presented as distinct customer-access functions, supporting separate consideration of account-recovery and access-control procedures.
- A Network Status facility and Help Centre are available for operational monitoring and support escalation.
- The site offers domain, hosting, email, and certificate services whose renewal and administrative-control arrangements can affect service continuity.

Summary Verdict

The website is a legitimate, established, and trustworthy commercial service with strong convergence across identity, historical continuity, reputation, page content, and observed behavior. No contradictory evidence undermines its stated purpose, and normal interaction—including account login, account actions, and standard transactions—is appropriate.

Infrastructure Integrity

The site is served directly from Australian hosting infrastructure without a detected CDN or WAF layer; one likely origin address was visible. Direct origin visibility is a conventional hosting configuration and, in this evidence, is not associated with abuse or malicious behavior. Valid transport encryption protects connections, although infrastructure controls alone are not proof of business legitimacy.

- The hosting infrastructure resolves to 112.109.81.236 on AS38719, operated by DREAMSCAPE-AS-AP — Dreamscape Networks Limited, AU.
- The DV TLS certificate was issued by Sectigo Public Server Authentication CA DV R36 and is valid until 2027-02-13.
- Infrastructure resolution identified one IP address, no edge addresses, and one likely origin address.
- The hosting address had 0 abuse reports and an abuse-confidence score of 0.

Closing Assessment

Prospective users may proceed with normal use, while enterprise customers should apply their standard procurement, access-control, and service-continuity checks before onboarding business-critical assets.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of discountdomains.co.nz.

- The request stayed on discountdomains.co.nz. It was not redirected to another domain. CLEAR
- Registration is published under Dreamscape Networks International Pte Ltd t/a Crazy Domains. CLEAR
- DNS for this domain is served by ds.network, across 2 name servers. NOTED
- The earliest public archive of this site is from 2002-11-23. CLEAR
- It is hosted on DREAMSCAPE-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about discountdomains.co.nz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
