

Is diyabetimben.com legit? TrustSniffer's high-trust assessment: 80/100

diyabetimben.com

Verdict

80

OUT OF 100

HIGH TRUST

diyabetimben.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Turkish community-driven website focused on Type-1 diabetes: articles, guides, news, and community resources. Includes account login/registration and social links. Primarily informational with low structural risk.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

diyabetimben.com is a Turkish community health and editorial website focused on Type 1 diabetes. It presents articles, news, practical guides, patient experiences, recipes, event information, and resources concerning insulin therapy, pumps, continuous glucose monitoring, carbohydrate counting, and diabetes management, with account registration and social-media engagement features.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-reputation indicators. The homepage presents a coherent health-community purpose, links to multiple established social platforms, and contains substantive topic coverage rather than financial promises, deposit requests, or other high-risk monetization mechanics. Behavioral testing did identify suspicious inline-script activity and password-form presence, but also found no cloaking, hidden forms, external password destinations, wallet activity, clipboard manipulation, or other abuse patterns; these are therefore limited technical cautions rather than evidence of impersonation. The real-world operator remains likely rather than independently verified.

EVIDENCE

- Homepage: identifies the site as “DiyabetimBen” and provides structured Type 1 diabetes categories, guides, news, and community resources.
- Homepage: links to Facebook, Instagram, LinkedIn, Twitter, and YouTube, supporting continuity between the site and its stated community presence.
- Behavioral review: observed suspicious inline scripts and login/registration forms, while recording no cloaking, hidden forms, wallet activity, clipboard manipulation, or external password submissions.
- External reputation checks: returned no malicious or suspicious detections and no confirmed phishing or blacklist result.

Regulatory Verification Notes

The site appears to operate as an informational and community health publication, not as a financial service or deposit-taking platform. No licensing authority or license number is identified in the supplied site analysis; for this business model, that is a transparency point requiring context rather than evidence of deception. The available material does not independently establish the legal entity operating the publication, although the site's sustained content and social presence are consistent with an established community project. A third-party broker-reputation dataset produced no match, which is contextual support only and is not a licensing or regulatory determination.

EVIDENCE

- Homepage: describes health-information categories including insulin injection, insulin pumps, CGMs, complications, patient rights, and diabetes education.
- Registration and login pages: provide standard account creation, authentication, and password-recovery functions.
- Domain registration: registered 2012-02-17 through IHS Telekom, Inc.; expiry recorded as 2027-02-17.
- Transport and hosting: served from AS24940 (HETZNER-AS - Hetzner Online GmbH, DE); TLS certificate issued by YE1 (DV), valid to 2026-10-24.

What to Verify Next

Before credential submission, an organization should confirm that the account functions are necessary for the intended use and that the privacy and data-handling terms are appropriate for health-related information. If the site requests donations, subscriptions, event payments, or other transactions, the recipient's legal identity, refund or cancellation terms, and payment-protection arrangements should be confirmed independently. Any clinically consequential information should also be checked against qualified medical guidance rather than treated as a substitute for professional advice.

EVIDENCE

- Homepage: presents informational articles, guides, recipes, patient stories, and event resources rather than a clearly defined commercial transaction service.
- Login and registration interfaces: request usernames, email addresses, and passwords, making data-minimization and account-security review relevant.
- Site navigation: includes community sections such as “Sizden Gelenler,” “Serbest Kürsü,” “Doktor Listesi,” and “Tez ve Çalışmalar,” which should be assessed for editorial moderation and source quality.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate health-community website. This classification supports ordinary informational use, while the operator's real-world identity should not be treated as independently proven.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, which is a mitigating control against direct origin exposure and some classes of automated abuse. The observed edge address is 5.9.161.84 on AS24940, operated by HETZNER-AS - Hetzner Online GmbH in Germany; the origin server was not observable in this analysis.

Closing Assessment

Routine browsing is proportionate to the assessed posture; credential or payment interactions should follow ordinary independent checks of the operator, applicable terms, and payment protections before proceeding.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of diyabetimben.com.

- The request stayed on diyabetimben.com. It was not redirected to another domain. CLEAR
- Registration is published under IHS Telekom, Inc. CLEAR
- DNS for this domain is served by trhdc.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-17. NOTED

- The earliest public archive of this site is from 2012-03-18. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about diyabetimben.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
