Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Diyanet Haber is an established Turkish institutional news and public-service portal operated by the Presidency of Religious Affairs, presenting religious-affairs news, government announcements, Islamic education, Hajj information, broadcasts, prayer times, local services, and current events.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious-reputation findings were observed. The homepage presents a coherent public-service model, including regional prayer-time data, religious news, broadcasts, authors, videos, and public-affairs content, with no login form, sensitive form, wallet connection, or deceptive financial mechanism. Normal interaction with the site is appropriate.

- The homepage is classified as a government/public-service news portal and identifies Diyanet Haber content across religious affairs, announcements, broadcasts, and public services.
- The homepage behavior analysis found no login form, hidden form, password-exfiltration form, wallet activity, clipboard hijacking, cloaking, or suspicious inline scripts.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- Domain registration evidence records creation on 2018-03-30, making the domain 8.35 years old.

Regulatory Verification Notes

The site's stated institutional purpose is public information and religious-affairs publishing rather than a regulated financial service. No financial license claim or license number is presented in the supplied evidence; this is a transparency point for formal institutional due diligence, not an indication of fraud. Third-party broker-context data produced no match. Technical hosting telemetry records AS13335, Cloudflare, Inc., US; the TLS certificate is domain-validated and issued by WE1.

- The homepage content identifies the business model as an institutional public-service news and information portal.
- The site presents no financial-product licensing claim or registration number in the supplied page evidence.
- Hosting telemetry records AS13335, Cloudflare, Inc., US.
- TLS telemetry records issuer WE1, validation level DV, valid through 2026-09-19.

What to Verify Next

For procurement, partnership, or formal reliance, confirm the site’s current institutional mandate and official contact channels through an independently sourced Presidency of Religious Affairs directory or published government channel. Where a regulated service is being considered outside the portal’s public-information role, verify the relevant provider and authorization separately.

- The homepage describes the portal as operated by the Presidency of Religious Affairs.
- The portal’s observed functions are news, religious information, announcements, broadcasts, and public-service tools.
- The supplied evidence contains no financial license number requiring validation.

Summary Verdict

The website presents as a legitimate, established, trustworthy institutional information service with a clean technical and reputational profile. Its observed content, behavior, identity, and infrastructure are consistent with normal public-service publishing, and ordinary use—including account login where applicable—is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All observed addresses were CDN edge addresses —104.21.72.37, 172.67.174.108, 2606:4700:3031::ac43:ae6c, and 2606:4700:3036::6815:4825—with no origin address exposed; this reduces direct origin exposure but is a mitigating control rather than proof of legitimacy.

Closing Assessment

Normal browsing and standard interaction may proceed; formal organizational engagements should include the independent institutional confirmation described above.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of diyanethaber.com.tr.

- The request stayed on diyanethaber.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com. NOTED
- The registration is paid up to 2031-03-29. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about diyanethaber.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
