

Is dminteract.com safe? TrustSniffer's low-trust assessment: 25/100

dminteract.com

Verdict

25
OUT OF 100

LOW TRUST

dminteract.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for DMInteract, a B2B supplier of interactive displays, smart workplace systems, and industrial machinery with product descriptions, global contact details (UAE, Canada, Pakistan, Senegal), and dealer/contact call-to-action.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

DMInteract®

What dminteract.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

DMInteract is a corporate B2B product-catalog website presenting interactive displays, smart workplace systems, signage, industrial and office machinery, and related technology solutions for enterprise customers, with revenue apparently derived from equipment sales, dealer partnerships, installations, and contact-based enquiries.

Scam/Impersonation Risk

Contradictions were observed. External reputation evaluation recorded a confirmed blacklist hit, including three malicious and two suspicious detections, creating a material security concern that is not offset by the site's professional presentation. The available page analysis did not identify brand impersonation, phishing forms, hidden forms, wallet activity, or credential-login functionality; however, the contradiction remains relevant to any sensitive interaction with the domain. The site's apparent business identity is also not independently verified, so its corporate presentation should not be treated as proof of the real-world operator.

EVIDENCE

- External reputation evaluation recorded 3 malicious detections and 2 suspicious detections for the domain, with blacklist status confirmed.
- The homepage was captured as a corporate/B2B product catalogue with a single contact form and no login form, password-external form, or hidden sensitive form detected.
- Domain registration records show creation on 2016-07-26 and an age of 10.07 years.
- Historical records show 66 archive snapshots spanning 2014–2025, with 12 years tracked.

Regulatory Verification Notes

The homepage presents DMInteract as a supplier of interactive displays, video walls, smart workplace systems, industrial shredders, counting machines, hospitality safes, mobility aids, stage lighting, and food-service machinery. It describes operations across the UAE, Canada, Pakistan, and Senegal and invites dealer and customer enquiries, but no licensing claim or license number was identified in the supplied site content. That is a disclosure and verification gap rather than standalone evidence of a scam; the more significant concern remains the independent reputation contradiction described above. The available evidence is consistent with a functioning corporate catalogue, but the operator's legal identity and any applicable commercial authorisations remain unverified.

EVIDENCE

- The homepage describes more than fifteen years of B2B activity across 22 product categories and provides global office/contact information.
- The site's product and contact pages support a sales-and-dealer business model rather than a financial-services or cryptocurrency model.
- Hosting is identified as AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site's TLS certificate was issued by WE1 at DV validation level and is valid to 2026-10-23 08:29:36 UTC.

What to Verify Next

Before any commercial engagement, an independent corporate-records check should confirm the contracting entity, its trading names, and its authority to supply or represent the listed equipment. Any dealer appointment, quotation, invoice, or payment instruction should be validated through contact details obtained independently from the site, and procurement should require standard contractual protections, payment controls, and delivery documentation. Security teams should also re-evaluate the domain's external reputation before permitting credentials, internal data, or other sensitive business interactions.

EVIDENCE

- The site provides product, dealer, and contact calls to action but does not independently establish the legal identity of the contracting party.
- The homepage contains a contact form rather than a sensitive account or payment workflow.
- The business model is based on equipment sales, installations, and dealer enquiries, making entity, authority, delivery, and payment verification the relevant control points.

Summary Verdict

The website presents a credible-looking corporate catalogue, but the overall trust posture is low because authoritative external threat signals create a material contradiction. The site may be a genuine supplier presentation, yet available evidence does not support treating the domain as trustworthy for sensitive engagement or as proof of an independently verified operator identity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were Cloudflare edge addresses rather than a directly exposed origin. This is a useful defensive and exposure-mitigation measure, but it is an infrastructure control only and does not resolve the domain’s reputation concerns.

Closing Assessment

Prospective users should restrict activity to passive review until the external reputation issue and operating-entity questions have been independently resolved, and should not submit credentials or initiate financial or other sensitive transactions in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dminteract.com.

- The request stayed on dminteract.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-26. NOTED
- The earliest public archive of this site is from 2014-12-17. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dminteract.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
