

Is dmtechnologies.co.in safe? TrustSniffer's low-trust assessment: 40/100

dmtechnologies.co.in

Verdict

40

OUT OF 100

LOW TRUST

dmtechnologies.co.in is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Safe for Read-Only

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

DM Technologies is a mid-stage digital agency site describing services (web & app development, custom software, branding, SEO, data security), portfolio items, testimonials, and contact info. No financial products, login screens, or crypto/payment solicitations are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Safe for Read-Only.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

DM Technologies is a digital-agency website presenting web and app development, custom software, branding, SEO, digital marketing, data security, portfolio work, testimonials, and contact options. Its apparent business model is to obtain client service engagements and ongoing support contracts rather than sell financial products or solicit cryptocurrency or payment activity.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed, and the site does not present login screens, financial solicitations, or crypto-related functionality. The principal adverse signal is reputational reporting associated with the hosting IP; that reporting is attributed to shared data-centre infrastructure rather than directly to the website, so it is a cautionary infrastructure signal rather than evidence that DM Technologies is impersonating another entity. The available evidence therefore supports a verify-before-proceeding posture without establishing a scam conclusion.

EVIDENCE

- The homepage presents a corporate digital-agency profile and contains no login form, sensitive submission form, crypto feature, or financial solicitation.
- Hosting IP 103.101.58.128 has 254 abuse reports and an abuse-confidence score of 72; the reports are attributed to shared infrastructure operated by Host.co.in.
- No blacklist or phishing detection was recorded for the website, and no brand-impersonation finding was identified.

Regulatory Verification Notes

The site's apparent commercial activity is general digital-agency work, so the supplied evidence does not indicate a financial-service licensing requirement. The website identifies itself as DM Technologies, while the registration record lists DM Technologies as the organization and HOSTINGER operations, UAB as registrar; however, the real-world operator remains independently unverified. No sector-specific license claim or registration number is presented in the available business profile, which is a transparency point for commercial due diligence rather than an identity contradiction. The combination of substantive service descriptions, portfolio material, and stable technical operation is consistent with an operating business, but does not by itself prove legal incorporation, ownership, or contractual standing.

EVIDENCE

- The domain was registered on 2024-04-23 and is approximately 2.33 years old; the registration record names DM Technologies and HOSTINGER operations, UAB.
- Historical captures record 194 snapshots spanning 2017–2024, with 8 years tracked.
- The site is served from AS146943, identified as TIER4CLOU-AS — Tier 4 Cloud Services, IN.
- Transport encryption uses a DV certificate issued by YR2, valid through 2026-09-20.

What to Verify Next

Before a paid engagement or transfer of sensitive business information, an independent check should connect DM Technologies to a legally identifiable contracting entity, confirm the contracting party's address and invoicing details, and review written scope, ownership, support, refund, and data-processing terms. Contact channels should be confirmed through an independent route, and portfolio references or client testimonials should be validated directly where the engagement is material.

EVIDENCE

- The homepage provides a telephone contact and refers to WhatsApp and email support.
- The homepage displays portfolio categories including logo design, website development, and SEO work, but the supplied evidence does not independently validate the underlying client references.
- The site's observed forms total zero, with no sensitive form or untrusted submission destination detected.

Summary Verdict

The website has a plausible and substantively described agency purpose, with no observed scam or impersonation contradiction, but the overall trust posture remains low and the operator’s real-world identity is not independently verified. It should be treated as an apparently legitimate business presence whose claims and contracting identity require confirmation before material commercial reliance.

Infrastructure Integrity

The website benefits from CDN/WAF protection, with observed CDN edge servers in AS16509 and potential origin infrastructure separately identified. This reduces direct exposure of the service infrastructure but is only a mitigating technical control and is not evidence of operator legitimacy.

Closing Assessment

Informational browsing is proportionate, while sensitive data sharing, contractual commitment, and high-value payment activity should wait until the counterparty and commercial terms have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 254 reports on hosting IP 103.101.58.128 (Host.co.in, Dedicated Server Provider, Data Center/Web Hosting/Transit), 72% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dmtechnologies.co.in.

- The request stayed on dmtechnologies.co.in. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-23. NOTED
- The earliest public archive of this site is from 2017-07-27. CLEAR
- It is hosted on TIER4CLOU-AS, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dmtechnologies.co.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
