

Is dnr.rs safe? TrustSniffer's low-trust assessment: 40/100

dnr.rs

Verdict

40

OUT OF 100

LOW TRUST

dnr.rs is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Company site for DNR Leskovac offering installation and maintenance of technical security systems (CCTV, alarms, access control, intercoms) with contact details, service descriptions and news/updates.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What dnr.rs served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

DNR Leskovac is a local Serbian commercial service website presenting the installation, maintenance, and technical support of physical-security and network systems, including video surveillance, alarm systems, access control, intercoms, ramps, and related equipment. Its apparent business model is project-based installation, hardware supply, maintenance contracts, and technical support for residential and commercial customers.

Scam/Impersonation Risk

The site presents a coherent local-service profile with a named business, address, telephone contact, service descriptions, and no observed login form, wallet connection, sensitive data form, or direct brand-impersonation mechanism. However, that ordinary presentation is materially outweighed by multiple external malicious detections and a confirmed blacklist status, creating a significant contradiction between the site's content and its external reputation. The available evidence therefore supports a high level of caution for credentials, financial activity, or other sensitive interaction; the site should not be treated as cleared solely because its pages appear professionally presented.

EVIDENCE

- The homepage identifies DNR Leskovac and describes physical-security installation, servicing, and technical-support services.
- External reputation checks recorded multiple malicious detections and a confirmed blacklist involving more than one source.
- The domain was registered on 2018-09-19 and is approximately 7.92 years old.
- Web-archive records contain 420 snapshots spanning 2020-11-01 to 2026-05-16, with 7 years tracked.

Regulatory Verification Notes

The available business disclosures identify DNR Leskovac and provide a Leskovac street address and contact channels, but independently verified operator identity is not established by the supplied evidence. No licensing authority or license number is presented in the available site information, so any authorization required for the installation or maintenance of technical-security systems remains a transparency and verification matter rather than proof of misconduct. The domain registration record names Loopia d.o.o. as registrar and DNR Leskovac as registrant, while the site's transport security is provided through a domain-validated certificate; neither establishes regulatory authorization or independently proves the real-world operator.

EVIDENCE

- The homepage displays the business name, address, telephone number, and service descriptions.
- The site's available business information contains no stated licensing authority or license number.
- Registrar: Loopia d.o.o.; registrant recorded as DNR Leskovac.
- TLS certificate issued by YR2 (DV), valid to 2026-10-25.

What to Verify Next

An independent company-register search should confirm that DNR Leskovac is a currently registered entity at the stated address and that the named contact channels correspond to it. Any Serbian authorization, certification, or contractor requirement applicable to the advertised technical-security work should be checked with the relevant official authority before commissioning services. For a prospective customer, payment terms, warranty coverage, service-level commitments, and contract-party details should be confirmed in writing, and official contact channels should be validated through an independent offline route before sensitive exchanges.

EVIDENCE

- The homepage supplies the legal-style business name, physical address, and telephone number needed for independent entity matching.
- The service pages describe installation, maintenance, and technical support, which provides the basis for checking sector-specific authorization requirements.
- The homepage advertises rapid response and 24-hour support, making written confirmation of service-level and warranty commitments appropriate.
- No online login or sensitive submission form was observed, so sensitive interaction would arise primarily through subsequent customer communications or transactions.

Summary Verdict

This is a **low-trust website with elevated sensitive-interaction risk**. The site has a plausible local-business presentation and established technical history, but the confirmed external reputation contradictions prevent a positive trust conclusion or independent identity confirmation.

Infrastructure Integrity

The site resolves directly through Loopia AB in Sweden on AS39570, with no CDN or WAF detected and two likely origin addresses identified. Direct hosting is a conventional infrastructure arrangement but provides limited protective separation from the hosting origin; it is therefore only a contextual mitigating or neutral factor and does not offset the external reputation findings.

Closing Assessment

Interaction should remain limited to non-sensitive information gathering until the business identity, applicable authorization, contractual terms, and payment protections have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dnr.rs.

- The request stayed on dnr.rs. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Loopia d.o.o.. [CLEAR](#)

- DNS for this domain is served by loopia.se, across 2 name servers. NOTED
- The registration is paid up to 2027-09-19. NOTED
- The earliest public archive of this site is from 2020-11-01. CLEAR
- It is hosted on LOOPIA, from a server in SE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dnr.rs at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
