

Is docusign.digital a scam? TrustSniffer's high-risk assessment: 0/100

docusign.digital

Verdict

0

OUT OF 100

CRITICAL RISK

docusign.digital shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal coming-soon landing page for 'docusign.digital' advertising an AI builder and free credits. Contains repeated brand-like text and a cookie consent notice; no forms, no transactions, and no verifiable claims.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	11 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	26% confidence AbuseIPDB, 13 reports; shared hosting inflates reports	CLEAR
Domain age	1.9 years old Registered history	CLEAR

The page as captured

<https://docusign.digital/>

What docusign.digital served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

docusign.digital is a minimal “Launching Soon” landing page presenting an AI website-builder concept under the phrases “Try Airo AI Builder,” “Start for free,” and “Get 50 free credits,” with no visible account, payment, or transaction workflow.

Scam/Impersonation Risk

Confirmed external contradiction signals require a security-forward posture. The domain is reported as blacklisted, with 11 malicious and one suspicious detections across evaluated reputation sources. This is materially inconsistent with treating the site as a trustworthy destination, even though the captured page itself contains no login form, hidden form, payment flow, wallet connection, or explicit impersonation indicator. Abuse reporting also exists for a shared Amazon CDN address; that signal concerns the shared infrastructure rather than conclusively attributing every report to this site, but it remains relevant supporting context. No distinct legal-entity identity contradiction or direct impersonation finding was observed.

EVIDENCE

- External reputation records show 11 malicious detections, 1 suspicious detection, and a confirmed blacklist status for the domain; a Tier-1 detection was also recorded.
- The domain registration record gives creation date 2025-12-23T20:01:27Z and WHOIS age 0.65 years; the reconciled archival domain-age assessment is 1.9000684462696784 years.
- Historical provenance records show 0 archive snapshots, first seen 2023-07-22T07:35:51Z, last seen 2025-07-16T12:40:09Z, and 3 years tracked.
- Abuse reporting records show 13 reports against shared CDN infrastructure, attributed to the IP subject rather than uniquely to the website.

Regulatory Verification Notes

The available landing page does not identify a verifiable operating company, responsible legal entity, licensing authority, or registration number. Its “AI builder” and free-credit presentation is a commercial proposition, but the page provides insufficient legal and governance detail to establish who would be responsible for any future service, data processing, or customer relationship. A separate broker-reputation dataset returned no match; that is contextual only and does not constitute licensing or regulatory clearance. Identity verification therefore remains unresolved, and the page should not be treated as evidence of an established regulated business.

EVIDENCE

- The homepage contains approximately 652 characters of text, repeated “docusign.digital” and “Launching Soon” text, and no identified legal-entity or licensing disclosure.
- Technical records identify registration through GoDaddy.com, LLC.
- The site is served from AS16509, Amazon.com, Inc., US.
- The transport certificate is DV, issued by GoDaddy TLS Intermediate CA DV - R1v1, valid to 2026-09-20T05:57:50+00:00.

What to Verify Next

Before any future expansion from informational viewing to registration, data submission, or commercial interaction, the operator should be independently identified through a corporate registry and any claimed service authorization should be checked with the relevant authority. The site’s official support and contact channels should also be confirmed through an independent, offline route, and any later request for credentials, payment details, downloads, or account access should be assessed only after those checks are complete.

EVIDENCE

- The homepage currently contains 0 forms, no sensitive-form destination, and no login form, so the intended account or payment process is not established.
- Browser observation recorded 14 external XHR requests, 11 non-whitelisted XHR requests, 2 non-whitelisted POST requests, and 6 console errors across 2 successful runs.
- The landing page presents “Get 50 free credits,” “Try Airo AI Builder,” and “Start for free,” but supplies no accompanying service terms or operational explanation in the captured content.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. Apparent legitimacy is not established, and the available evidence does not support treating the site as a trustworthy destination for credentials, financial information, or other sensitive activity.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, with observed edge addresses 13.248.243.5 and 76.223.105.230 on Amazon AS16509; no origin candidate was observable. This provides a meaningful exposure-mitigation layer, but infrastructure protection does not establish operator legitimacy and cannot offset the external reputation contradiction.

Closing Assessment

The appropriate posture is passive viewing only; credentials, financial information, downloads, and other sensitive interactions should not be undertaken unless the operator and service legitimacy are independently established.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of docusign.digital.

- The request stayed on docusign.digital. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-23. NOTED
- The earliest public archive of this site is from 2023-07-22. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about docusign.digital at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
