

Is domainshop.ru legit? TrustSniffer's high-trust assessment: 100/100

domainshop.ru

Verdict

100

OUT OF 100

HIGH TRUST

domainshop.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language commercial website offering .RU and .PH domain registration and related registrar services. The page presents pricing, payment options, administrative procedures, support email, telephone number, and a Moscow address, with no evident phishing, investment, or deceptive-return claims in the supplied content.

Evidence status and limitations

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Russian-language domain-registration service offering .RU and .PФ registrations, domain-administration support, registrar transfers, WHOIS access, dispute procedures, and portfolio-based pricing, with registrations advertised from 189 rubles.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive-return claims, or other fraud signals were observed. The service proposition is coherent across the homepage: pricing, administrative procedures, payment methods, and customer-support arrangements all align with a conventional domain-registrar business. Its long operating history, substantial archival continuity, established traffic footprint, and clean external reputation strongly support the conclusion that this is a legitimate service rather than a recently created imitation.

- The domain-registration record shows registration in 2016 (~10.08 years old), through registrar DOMAINSHOP-RU, with expiry on 2027-07-05.
- The web archive contains 441 snapshots spanning 2016-10-02 to 2026-06-22 (11 years tracked), with no suspicious repurposing or semantic drift identified.
- The homepage presents internally consistent registrar functions, including domain-rights transfers, registrar-support transfers, registration cancellation, WHOIS rules, and dispute procedures.
- External reputation assessment found 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and a global traffic rank of 51,730.

Regulatory Verification Notes

The homepage describes the service as operating through an accredited domain registrar, but the supplied page content does not establish the accrediting authority, accredited legal entity, or accreditation identifier. This is a limited disclosure-verification point rather than evidence of misconduct, particularly because the site also provides navigation to company, documents, application-form, and contact materials. No conflicting legal-entity names were identified, and the available third-party broker context produced no relevant match.

- The homepage title expressly presents .RU and .PФ registration through an accredited domain registrar.
- The homepage navigation includes “Documents,” “Application Forms,” “About the Company,” and “Contacts,” indicating dedicated routes for corporate and procedural information.
- The site's transport encryption uses a WE1-issued DV TLS certificate, valid to 2026-10-09.

- The homepage states that payments can be made by bank card or bank transfer, consistent with its disclosed fee-based commercial model.

What to Verify Next

For procurement or enterprise onboarding, the appropriate due-diligence step is to match the legal entity and accreditation details in the site's company and document materials against the relevant .RU/.PF registry. Contracting teams should also review renewal, transfer, cancellation, dispute, and portfolio-discount terms before placing domains under management, and confirm official contact channels through an independent corporate record.

- The homepage advertises special commercial terms for customers managing large domain portfolios, making the applicable pricing schedule relevant to institutional onboarding.
- The service menu identifies separate procedures for transferring domain-administration rights and moving domain support between registrars.
- The homepage provides a Moscow street address and telephone contact, supplying identifiers suitable for independent corporate-record comparison.

Summary Verdict

The website is a legitimate, established, and trustworthy domain-registration service. Its identity, operating model, historical continuity, external reputation, and observed behavior converge without contradictory risk signals; normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF, and all four observed addresses were Cloudflare edge nodes; this reduces direct exposure of the origin environment but is a protective control rather than independent proof of legitimacy.

- The site is served from AS13335 (CLOUDFLARENET – Cloudflare, Inc., US).
- Hosting analysis identified 4 unique IP addresses, all classified as CDN edge addresses, with Cloudflare detected as the infrastructure provider.

Closing Assessment

Prospective users may proceed with ordinary account access and domain-service transactions, while organizations undertaking contractual onboarding should complete their standard corporate and accreditation checks.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of domainshop.ru.

- The request stayed on domainshop.ru. It was not redirected to another domain. CLEAR
- Registration is published under DOMAINSHOP-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-07-05. NOTED
- The earliest public archive of this site is from 2016-10-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about domainshop.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
