What dominiosistemas.com.br served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

What the website presents is a corporate product platform for Thomson Reuters Soluções Domínio, offering accounting software suites such as Domínio One, Domínio Pro, and Domínio Max, together with cloud services, digital certificates, support, training, tax and accounting content, and a sales lead-capture channel. Its apparent business model is subscription-based accounting software and related professional services for accounting firms.

Scam/Impersonation Risk

No scam, phishing, blacklist, brand-impersonation, or conflicting-identity contradictions were observed. The homepage consistently presents a professional Thomson Reuters Domínio business, links to corporate social channels, and uses a standard contact and sales workflow rather than a sensitive credential-collection form. Automated interaction did identify a hidden form and substantial page-structure change, but the available interpretation classifies the hidden element as non-sensitive; there were no password-external forms, wallet activity, cloaking, clipboard manipulation, or other abuse patterns. The site therefore reads as apparently legitimate, while the operator connection remains likely rather than independently proven.

EVIDENCE

- The homepage is titled “Sistema para contabilidade | Thomson Reuters - Soluções Domínio” and identifies accounting software, support, training, and related business services.
- Automated interaction recorded 1 hidden form, 0 password-external forms, 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 cloaking detections across 2 successful runs.
- The domain was registered on 1999-03-30 and is 27.4 years old.

Regulatory Verification Notes

The site provides corporate product, support, contact, terms-of-use, privacy, and content pathways, but the supplied page evidence does not establish an independently verified operator identity or a specific regulatory licence. No licence or registration number is claimed in the reviewed content; for an accounting-software provider, this is a disclosure and applicability check rather than evidence of deception. External reputation checks found no malicious or suspicious detections, and no broker-dataset match was present. The available evidence is consequently consistent with an established corporate service, subject to ordinary merchant-identity and contractual verification.

EVIDENCE

- The homepage links to “Sobre nós,” “Suporte,” “Contato,” and “Termos de uso,” with a separate privacy-policy reference to Thomson Reuters.
- The site's transport certificate is OV-validated, issued by Sectigo Public Server Authentication CA OV R40, and valid through 2026-12-10.
- The domain registration record identifies THOMSON REUTERS BRASIL CONTEUDO E TECNOLOGIA LTDA as the owner.
- External checking recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.

What to Verify Next

Before credential or payment interactions, independently confirm that the contracting entity named in the applicable terms and commercial documentation is the intended Thomson Reuters entity, review subscription, cancellation, refund, and service-support provisions, and confirm available payment-protection mechanisms. Where the intended service or transaction may be subject to sector-specific requirements, confirm any applicable registration or licensing through the relevant official registry rather than relying solely on on-site claims. Official support and contact channels should also be confirmed through an independent corporate route.

EVIDENCE

- The site exposes a dedicated Terms of Use page for contractual review.
- The site exposes a dedicated Contact page for confirmation of commercial channels.
- The homepage includes a lead-generation/contact form rather than a sensitive form for password submission.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate corporate website. Identity linkage is likely but not independently verified, so the positive trust conclusion should not be treated as conclusive proof of the real-world operator.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, a meaningful mitigating control against direct origin exposure and common web abuse, although protective hosting alone does not prove legitimacy. The observed infrastructure resolved through an AWS edge rather than a directly exposed origin.

EVIDENCE

- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- Observed edge IP: 56.125.212.53.
- CDN/WAF provider identified as AWS; likely origin IP count was 0.

Closing Assessment

The site is suitable for ordinary business evaluation, with independent confirmation of the contracting entity, commercial terms, and payment protections completed before credentials or payments are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dominiosistemas.com.br.

- The request stayed on dominiosistemas.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 234.80, across 3 name servers. NOTED
- The registration is paid up to 2027-03-30. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dominiosistemas.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
