

Is don.telethon.fr legit? TrustSniffer's high-trust assessment: 100/100

don.telethon.fr

Verdict

100

OUT OF 100

HIGH TRUST

don.telethon.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

French AFM-Téléthon donation page accepting card, PayPal, Apple Pay, and cheque contributions. It collects donor identity and contact information for payment administration and tax receipts, explains the charitable purpose and tax treatment, and provides privacy, legal, contact, certification, and financial-reporting information.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is AFM-Téléthon's online donation service, presenting one-time and recurring contribution options to fund rare-disease research and support for patients and families, with payment administration, donor information collection, tax-receipt handling, and access to organisational reporting.

Scam/Impersonation Risk

No phishing, brand impersonation, conflicting legal identity, malicious reputation, or other identity contradiction was observed. The donation mechanics—card, PayPal, Apple Pay, and cheque contributions—are consistent with the stated charitable purpose, while the payment and personal-information form was not found to submit to an untrusted destination. The long-established domain and extensive historical record strongly support provenance, with no evidence that the site was repurposed from a materially different business.

- The homepage identifies the campaign as “Téléthon 2025” for the benefit of AFM-Téléthon and explains that contributions support rare-disease research and assistance for affected families.
- The domain was registered in 1998 and is approximately 27.74 years old; the registrar is NAMESHIELD.
- The web archive contains 2,084 snapshots spanning December 2005 to June 2026, covering 22 tracked years with no demonstrated category shift.
- Technical reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no external threat listing, and no matching malicious signatures.

Regulatory Verification Notes

The site presents the disclosures expected of an established charitable donation service, including privacy, legal, contact, certification, tax-treatment, and financial-reporting information. It does not present itself as a broker or financial-investment platform, and the available third-party broker context produced no relevant match. The on-page evidence does not establish a specific statutory charity registration or supervisory authorization; this is a limited documentary-verification point rather than evidence of illegitimacy.

- The legal and privacy materials explain donor-data processing, cookie preferences, and the use of personal information for payment administration and tax receipts.
- The reporting links provide access to annual and financial information concerning the organisation's use of donations.
- The site's transport encryption uses an Amazon RSA 2048 M04 domain-validated certificate, valid until 5 January 2027.

- The tested endpoint was served from AS16509 (Amazon.com, Inc.) in the United States.

What to Verify Next

Institutional due diligence may confirm AFM-Téléthon’s legal status and charitable-registration particulars directly with the relevant French registry, reconcile tax-deductibility representations with the donor’s jurisdiction, and confirm official contact channels independently when processing unusually large or corporate contributions.

- The donation form offers both immediate and monthly contribution paths, creating distinct payment-authorisation and cancellation considerations.
- The homepage illustrates post-tax donation costs for individual donors, making jurisdiction-specific eligibility material to reliance on the stated tax treatment.
- A dedicated donor account area is presented for ongoing donor administration.
- The page provides legal, privacy, contact, certification, and financial-reporting paths that can support formal institutional due diligence.

Summary Verdict

This is a legitimate, established, and trustworthy website with strong convergence between its identity, historical provenance, page content, operational behavior, and clean external reputation. No contradictory security or identity signals were identified, and normal interaction—including account login, donation submission, and standard account use—is appropriate.

Infrastructure Integrity

Infrastructure observations show service delivery through established hosting networks: the hosting profile identifies Claranet Limited on AS8426 in Germany, while the tested endpoint resolved through Amazon infrastructure. No CDN or WAF was identified, and four likely origin addresses were visible; this is an architectural exposure characteristic, but the normalized infrastructure assessment found no associated abuse pattern or confirmed security threat.

Closing Assessment

Prospective donors may use the site normally, applying ordinary payment controls and institutional approval procedures proportionate to the value and nature of the contribution.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of don.telethon.fr.

- The request stayed on don.telethon.fr. It was not redirected to another domain. CLEAR
- Registration is published under NAMESHIELD. CLEAR
- DNS for this domain is served by clara.net, across 6 name servers. NOTED
- The registration is paid up to 2027-07-12. NOTED
- The earliest public archive of this site is from 2005-12-01. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about don.telethon.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
