## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

DonDominio is a commercial domain registrar and hosting provider offering domain registration, web and email hosting, SSL certificates, reseller services, support resources, and developer APIs. Its apparent business model is direct and recurring sales of domains, hosting plans, email services, certificates, renewals, and related management tools.

### Scam/Impersonation Risk

No contradictions were observed. The site's product structure, pricing-oriented service pages, help resources, contact pathways, legal materials, and account functions are consistent with an established registrar and hosting operation rather than a phishing or impersonation page. External reputation checks found no malicious or suspicious classification, while the site also has a top-tier global traffic footprint. Interaction testing recorded dynamic page changes and external form submissions, but no hidden forms, externally submitted password forms, wallet activity, clipboard manipulation, or cloaking; these observations do not establish an abuse pattern. The real-world operator remains independently unverified, so the legitimacy assessment is evidence-consistent rather than identity-proven.

#### EVIDENCE

- Domain registration record: registered 2006-03-20, approximately 20.41 years old.
- Web archive: 1,498 snapshots spanning 2004–2022, covering 19 tracked years.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and global traffic rank 2,241; the site is within the top 1 million.

### Regulatory Verification Notes

The legal and identity navigation includes company information, privacy documentation, an abuse policy, registrant-rights material, an ethical channel, and general legal pages. However, the supplied content does not identify a specific regulatory licence or licence number for the commercial services presented; this is a transparency and regulatory-verification point, not evidence of impersonation or fraud. The registrar record identifies DonDominio (SCIP), and the available infrastructure and transport signals are consistent with a long-running commercial service. No matching third-party broker warning was identified, although that contextual signal is not a licensing determination.

#### EVIDENCE

- Domain registrar: DonDominio (SCIP).
- Hosting: served from AS57910, SCIP-AS – Soluciones Corporativas IP, SL, ES.
- Transport encryption: TLS certificate issued by Sectigo Public Server Authentication CA DV R36, validation level DV, valid to 2027-02-21.
- The homepage and legal navigation expose company, privacy, abuse-policy, registrant-rights, ethical-channel, and legal-information pages.

#### What to Verify Next

Before credential or payment interactions, an enterprise or prospective customer should independently confirm the responsible merchant identity, applicable registrar or hosting authorisations, renewal and refund terms, and available payment-protection mechanisms. The relevant official registry should be used for any licence or registration check, and support or account channels should be confirmed through an independently sourced contact route rather than relying solely on an in-session link. Product terms should also be reviewed for domain transfer, renewal, suspension, and dispute procedures.

#### EVIDENCE

- The service catalogue and legal navigation provide identifiable pages against which merchant-identity and contractual checks can be performed.
- Domain, hosting, email, and SSL offerings are presented as commercial products with pricing and support workflows on the service pages.
- The account area includes login and account-creation pathways, making independent confirmation of the official access channel appropriate before credential submission.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary use. The assessment does not independently prove the real-world identity of the operator, so legitimacy should be understood as strongly supported by converging evidence rather than conclusively verified.

#### Infrastructure Integrity

The site has no detected CDN or WAF edge layer and resolves through a single identified origin address. This provides less intermediary shielding than a proxied deployment, but the resolved hosting arrangement and stable encrypted service remain mitigating infrastructure characteristics rather than indicators of compromise.

#### Closing Assessment

Normal browsing and routine service evaluation are proportionate, with independent merchant-identity, contractual, and payment-protection checks completed before credentials or funds are committed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of dondominio.com.

- The request stayed on dondominio.com. It was not redirected to another domain. CLEAR
- Registration is published under DonDominio (SCIP). CLEAR
- DNS for this domain is served by dondominio.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-20. NOTED
- The earliest public archive of this site is from 2004-03-19. CLEAR
- It is hosted on SCIP-AS, from a server in ES. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about dondominio.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
