- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Portuguese-language local news portal serving Dourados and the wider Mato Grosso do Sul region, presenting current affairs, politics, public-safety reporting, economic information, columns, multimedia coverage, event galleries, polls, and sponsored articles through an advertising- and media-placement-supported publishing model.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or other fraud-related conflicts were observed. The site operates as a conventional news publisher rather than a deposit-taking or transactional platform: the assessed homepage contained no login form, sensitive-data form, cryptocurrency functionality, or deceptive financial solicitation. Its long domain tenure, extensive archival record, and clean external threat reputation converge strongly with the current editorial purpose.

- The homepage identifies itself as “Dourados News” and presents locally focused editorial categories, current headlines, columns, and clearly marked “Informe Publicitário” material.
- Homepage behavior showed no login form, no password submission to an external destination, no wallet interaction, no clipboard hijacking, no cloaking, and no suspicious inline scripts.
- The domain was registered on 28 October 2000 and is approximately 25.78 years old; registration currently extends to 28 October 2031.
- The web archive contains 5,000 snapshots from 20 February 2001 through 8 November 2025, covering 25 tracked years, with no detected suspicious repurposing or semantic conflict.

Regulatory Verification Notes

The registered owner is Dourados News Empresa Jornalística e Editora Ltda, which is consistent with the site’s presented role as a journalistic and publishing business. The homepage navigation exposes institutional, staff or masthead, contact, and media-kit routes, supporting an identifiable operating presence. No financial-service or investment-license claim is made, and such authorization is not inherently expected for the observed news-publishing model; the supplied evidence does not establish the detailed disclosures contained within those institutional pages.

- The domain-registration record names Dourados News Empresa Jornalística e Editora Ltda as the owner.
- The homepage navigation includes “Institucional,” “Expediente,” “Fale Conosco,” and “Kit multimídia” sections.

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 6 September 2026.
- The homepage describes editorial and media-publishing activity without presenting a broker, investment, deposit, or cryptocurrency service.

What to Verify Next

Routine enterprise onboarding should confirm the current masthead and responsible publisher through the institutional materials, reconcile commercial engagement details with formal contracting documents, and validate official communications through the site's published channels. Prospective advertisers should also confirm sponsorship labelling, placement terms, and invoicing details before committing campaign funds.

- The homepage publishes a telephone contact channel for organizational communication.
- Dedicated masthead and institutional routes provide the appropriate starting points for confirming editorial responsibility.
- A dedicated multimedia-kit route indicates a formal pathway for advertising or media-placement enquiries.
- Sponsored homepage items are visibly distinguished from ordinary editorial headlines by a specific advertising label.

Summary Verdict

The site is legitimate, established, and trustworthy, with a coherent identity and no observed contradictory risk signals. The convergence of provenance, operational behavior, reputation, and substantive editorial content supports a high-confidence posture for ordinary use.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF, and all four observed addresses were Cloudflare edge nodes rather than origin-server candidates. This reduces direct origin exposure and provides a mainstream protective layer, although infrastructure protection is a mitigating security control rather than independent proof of legitimacy.

- The site is served from AS13335 (Cloudflare, Inc., US).
- Four addresses were observed, all classified as CDN edge addresses; no origin-server candidate was identified.

Closing Assessment

Normal interaction, including account login if offered and standard use of the site's services, is appropriate; ordinary contractual due diligence remains sufficient for any commercial engagement.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of douradosnews.com.br.

- The request stayed on douradosnews.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-10-28. CLEAR
- The earliest public archive of this site is from 2001-02-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about douradosnews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
