

Is dpsciechanow.pl safe? TrustSniffer's moderate-trust assessment: 65/100

dpsciechanow.pl

Verdict

65
OUT OF 100

MODERATE TRUST

dpsciechanow.pl is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be	Local social care home website (DPS Ciechanów) containing legitimate contact information and navigation, but the news/content area is populated with unrelated gambling/spam posts and external links, indicating likely site compromise or content injection.

Key findings

- Automated classification: Governance Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

DPS Ciechanów is a local public social-care-home website presenting institutional information, resident services, announcements, contact details, accessibility controls, and links to sections such as rehabilitation, healthcare, therapy, culture, and admission procedures. Its apparent purpose is to provide an informational public-service channel rather than to sell products or process commercial transactions.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or conflicting-identity contradictions were observed. The principal concern is **content integrity**: the homepage presents itself as a social-care institution, yet its news area contains unrelated Russian- and Italian-language gambling articles promoting casino content, posts attributed to “wagner_web,” and links to unrelated external domains. This is materially inconsistent with the site’s stated institutional purpose and is consistent with possible content injection or compromise, although the available evidence does not establish that the underlying institution is fraudulent. The site also provides a Facebook link and institutional navigation, while no login form, sensitive form, wallet connection, or credential-collection mechanism was detected.

EVIDENCE

- The homepage identifies “DPS Ciechanów” and provides navigation for institutional services, residents, documents, announcements, and contact information.
- The homepage news area contains casino and online-gambling articles dated 19 August 2026 and attributed to “wagner_web,” which are unrelated to social-care operations.
- The homepage links to unrelated external domains, including test123.com, kohm.ru, and aidar.ru.
- Domain registration continuity: created 2012-08-08 and aged 14.04 years; archive coverage is recorded from 2013-09-12 through 2026-05-17, spanning 14 years.

Regulatory Verification Notes

The website presents as a public institutional service and includes “About,” contact, documents, announcements, and resident-information areas. However, the available page evidence does not establish the legal operator, municipal relationship, or any licensing or registration reference; this is a transparency and verification matter rather than evidence of a scam. The identity connection is therefore apparent and evidence-consistent but not independently verified. The available external reputation signals show no reported abuse findings, no detected blacklist status, and no matching broker-reputation record, although reputation coverage is partial and should not be treated as a regulatory determination.

EVIDENCE

- The “About,” “Documents,” “Announcements,” and “Contact” areas are present in the site navigation.
- The site’s business presentation is an informational public social-care service and does not show direct commercial monetization.
- The website is served on AS16276 by OVH - OVH SAS, France.
- Its TLS certificate uses DV validation, is issued by YE2, and is valid to 2026-09-28.

What to Verify Next

An independent public-sector or municipal source should be used to confirm that the domain is the authorized web channel for DPS Ciechanów. The institution’s legal name, responsible authority, and official contact routes should be matched against an authoritative offline or independently obtained record before sensitive administrative exchanges. Any unusual news posts should be treated as untrusted site content until the institution confirms that the website has been reviewed and restored.

EVIDENCE

- The homepage’s institutional identity and contact details require confirmation through an independent public-sector source.
- The unrelated gambling material provides a concrete reason to confirm the site’s content integrity with the institution.
- No sensitive forms or login mechanisms were observed during the page and behavior review.

Summary Verdict

The website has a **moderate trust posture**: its institutional purpose, long-running domain presence, stable technical operation, and absence of active threat or impersonation indicators support apparent legitimacy, while the unexplained gambling content materially reduces confidence in current site governance and content integrity. The available evidence supports ordinary informational use with measured caution, but does not independently prove the real-world operator’s identity.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, with the observed edge address associated with AS16276 and OVH - OVH SAS; the origin server was not observable in this analysis. This reduces direct exposure of the origin and is a mitigating infrastructure characteristic, but it does not validate the site’s institutional ownership or the integrity of its published content.

Closing Assessment

Informational browsing is proportionate, while sensitive correspondence or high-value actions should follow independent confirmation of the institution’s official web and contact channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dpsciechanow.pl.

- The request stayed on dpsciechanow.pl. It was not redirected to another domain. CLEAR
- Registration is published under OVH SAS. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2027-08-08. NOTED
- The earliest public archive of this site is from 2013-09-12. CLEAR

- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dpsciechanow.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
