Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Dragonpay is a Philippine online payment platform that presents online collections, mass payouts, recurring payments, merchant API integration, and multiple local payment channels for businesses and their customers.

Scam/Impersonation Risk

No contradictions were observed. The site's business identity, corporate presentation, payment-services content, and observed behavior are consistent with an established payment platform rather than a phishing or impersonation operation. External reputation checks were clean, with no malicious, suspicious, or blacklist findings.

- The homepage identifies Dragonpay as a Philippine payment-services provider and presents a coherent corporate business model.
- The homepage contains no login form, sensitive form, hidden form, or untrusted submission destination.
- Domain registration is dated to 2010, with an age of approximately 15.964 years.
- The archive contains 373 snapshots spanning 2010–2026, covering 17 tracked years.

Regulatory Verification Notes

The site identifies Dragonpay Corporation as a Xendit company and states that it is regulated by the Bangko Sentral ng Pilipinas. Its pages describe online collections, mass payouts, recurring payments, and merchant API services, but the supplied evidence does not independently verify a license number or current registry entry; this is a targeted transparency item rather than an indication of deception. The overall identity and disclosure presentation remains consistent with a legitimate, established business.

- The About and homepage content identify Dragonpay Corporation and its Xendit affiliation.
- The homepage states Bangko Sentral ng Pilipinas regulation and describes the payment-services offering.
- The site presents merchant integration, pricing, requirements, developer, support, and partner-sign-up pathways.

What to Verify Next

For formal onboarding or regulated payment activity, confirm the entity's current authorization directly with the relevant Bangko Sentral ng Pilipinas registry and validate contractual counterparties through independently sourced corporate channels. Standard customer-support details and operating hours should also be cross-checked through an official, offline route before establishing institutional processes.

- The site provides customer-support availability and a dedicated contact pathway on its homepage.

- The site exposes separate partner, requirements, pricing, and developer pathways relevant to institutional due diligence.

Summary Verdict

The website presents a legitimate, established, and trustworthy identity with a high-trust posture. Its content, historical continuity, technical stability, and external reputation converge without contradictory signals.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, with observed traffic terminating at Cloudflare edge infrastructure; the origin server was not observable in the analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, not independent proof of legitimacy.

- Served from AS13335 (Cloudflare, Inc.).
- Observed edge IPs were 172.66.42.209 and 172.66.41.47.
- TLS certificate issued by WE1 (DV), valid to 2026-09-25T19:19:55+00:00.

Closing Assessment

Normal interaction, including account login, account actions, and standard transactions, is appropriate. Formal commercial engagement should follow the institution’s ordinary counterparty and regulatory onboarding controls.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dragonpay.ph.

- The request stayed on dragonpay.ph. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2010-08-14. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dragonpay.ph at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
