

Is drdanielcantu.com safe? TrustSniffer's moderate-trust assessment: 65/100

drdanielcantu.com

Verdict

65
OUT OF 100

MODERATE TRUST

drdanielcantu.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Clinic site for Dr. Daniel Cantú, an allergist in Monterrey offering diagnostics, treatments, immunotherapy, and wellness programs. Includes contact phone, credentials, and program descriptions.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the online clinic of Dr. Daniel Cantú, an allergist in Monterrey, presenting medical consultations, allergy diagnostics, treatments, immunotherapy, and paid wellness programs for prospective patients seeking online or in-person care.

Scam/Impersonation Risk

No contradictions were observed. The homepage identifies a specific medical practitioner and clinic, describes allergy-related services in concrete terms, provides appointment and contact pathways, and links to Facebook and Instagram. The site does not present financial solicitation, credential-harvesting forms, cryptocurrency functionality, brand-impersonation indicators, or other confirmed phishing characteristics. Identity is **apparently consistent** with the presented practitioner, but the available evidence does not independently verify the real-world operator.

EVIDENCE

- The homepage identifies “Dr. Daniel Cantú” as an allergist in Monterrey and describes treatment for rhinitis, asthma, dermatitis, food and medication allergies, immunodeficiencies, and related conditions.
- The homepage contains a contact and appointment-request form; no login form, hidden form, password submission, or untrusted form destination was observed.
- The homepage links to Facebook and Instagram and records no detected brand-impersonation indicators.
- Domain registration records show creation on 2025-01-27, with an age of 1.56 years and expiry on 2027-01-27.

Regulatory Verification Notes

The website presents medical credentials and describes consultations, diagnostic testing, allergy vaccines, immunotherapy, and monthly health challenges. It does not state a license authority or license number in the supplied content, so professional authorization and the legal entity responsible for paid programs remain verification matters rather than established facts. The “Restart Inmunológico,” “Restart Inflamatorio,” and “Restart Digestivo” programs are described as 30-day challenges based on precision medicine, scientific evidence, immune-system improvement, inflammation reduction, and digestive health; those claims warrant appropriate clinical and consumer-protection review before enrollment. No adverse broker-reputation match or confirmed external threat finding was supplied.

EVIDENCE

- The homepage describes online and in-person consultations, allergy testing, immunotherapy, and “Vacunas de cartilla.”
- The Programs content lists three 30-day challenges with start dates marked “Próximamente” and health-improvement objectives.
- The site’s hosting infrastructure is served from AS8560, IONOS-AS – IONOS SE, DE; its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-08.
- Recorded archive coverage spans 2021-12-01 through 2025-07-11, representing 5 years tracked.

What to Verify Next

Before a high-value medical purchase or enrollment, the clinic’s practitioner credentials and applicable professional registration should be confirmed through the relevant Mexican professional or health-authority registry. The responsible legal entity, program terms, refund conditions, clinical scope, and payment protections should be confirmed from the site’s legal or enrollment materials. Contact details should also be corroborated through an independent channel, and any medical claims should be assessed against the qualifications of the named practitioner and the written program terms.

EVIDENCE

- The homepage identifies the practitioner and lists clinical services but does not supply a license authority or license number in the supplied content.
- The homepage presents paid programs with defined 30-day durations and stated health objectives, creating a clear basis for checking enrollment and refund terms.
- The site contains one contact or appointment-request form and no sensitive credential-submission form.
- The page title identifies the service as “Dr. Daniel Cantú – Alergólogo en Monterrey.”

Summary Verdict

The website has a **moderate-trust posture** with no observed scam, phishing, impersonation, or blacklist contradiction. Its medical-clinic presentation, concrete service content, stable page behavior, social presence, valid transport encryption, and clean supplied threat signals support an evidence-consistent legitimacy assessment, while the available evidence does not independently prove the operator’s real-world identity.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, with the observed edge address associated with AS8560 and IONOS-AS – IONOS SE, DE; no origin candidate was observed. This architecture is a mitigating control against direct origin exposure, but it is not proof of ownership or clinical legitimacy.

Closing Assessment

Ordinary informational browsing and appointment research are proportionate, while credentials, payments, and substantial program commitments should follow independent practitioner, authorization, contractual, and payment-protection checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of drdanielcantu.com.

- The request stayed on drdanielcantu.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by ui-dns.biz, across 4 name servers. NOTED
- The registration is paid up to 2027-01-27. NOTED
- The earliest public archive of this site is from 2021-12-01. CLEAR
- It is hosted on IONOS-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about drdanielcantu.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
