Full analysis

Overview

Dreamjob.ma is a French-language Moroccan employment portal that presents regional and international job listings, public-sector examination results, private-sector vacancies, internships, remote-work opportunities, career guidance, and recruiter services, with an apparent business model based on employment advertising and paid employer postings.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or conflicting-identity indicators were observed. The homepage presents a coherent employment-listing model rather than a deceptive financial or investment proposition, and the available behavioral evidence found no login form, hidden sensitive form, password-exfiltration destination, wallet activity, cloaking, or suspicious inline scripts. The site should therefore be regarded as apparently legitimate and low risk for ordinary informational use, while the real-world operator remains independently unverified.

EVIDENCE

- Homepage: French-language navigation covers Moroccan city employment, international vacancies, public-sector concours, private employment, internships, remote work, orientation, news, CV services, and “Publier une offre.”
- Homepage behavior: 0 login forms, 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 cloaking detections.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit were recorded.
- Domain registration: created 2025-10-30T09:13:25Z and recorded as 0.78 years old; registrar: GENIOUS COMMUNICATIONS.

Regulatory Verification Notes

The website appears informational rather than a regulated financial service, and no regulated broker or comparable third-party business match was recorded. The supplied page evidence does not show a license claim, license number, or clearly established corporate disclosure; this is a transparency matter requiring ordinary identity verification, not evidence of a scam. The available registration record identifies an owner, but the connection between that record and the operating business has not been independently verified.

EVIDENCE

- Homepage: the stated purpose is employment publishing and recruitment advertising, with no financial-product or regulated-investment offering identified.
- Transport encryption: TLS is issued by WE1 at DV validation level and is valid to 2026-10-06T01:06:01+00:00.
- Hosting telemetry: served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Registration record: expiration is 2028-10-30T09:13:25Z; registrar is GENIOUS COMMUNICATIONS.

What to Verify Next

Before submitting sensitive personal information, an independent check should confirm that the portal's operating business and published contact channels correspond to a real entity. Individual vacancies should be validated through the named employer's official careers channel, particularly where an application requests identity documents, fees, banking details, or unusually extensive personal data. Any paid recruiter service should be covered by clear terms, refund conditions, and payment protections.

EVIDENCE

- Homepage: vacancies are attributed to employers including ARIA, Finéa, Manpower Group, and Crédit du Maroc, creating a specific basis for direct employer confirmation.
- Homepage: the presence of "Publier une offre" indicates a recruiter-facing service that warrants confirmation of commercial terms before payment.
- Page presentation: the site is listing-focused and contains no sensitive submission form in the analyzed page capture, so later application workflows should be assessed separately.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate employment website and supports a high-trust, low-risk posture. No contradictions were observed, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure and common delivery threats. All observed addresses were Cloudflare edge infrastructure, with no origin-server candidate identified in the infrastructure assessment; this supports resilience and exposure reduction but is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before credential submission, personal-data upload, or payment, standard independent checks of the relevant employer, operating entity, terms, and payment protections should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dreamjob.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
