

Is dreammail.jp legit? TrustSniffer's high-trust assessment: 100/100

dreammail.jp

Verdict

100

OUT OF 100

HIGH TRUST

dreammail.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Japanese sweepstakes and rewards site where users can participate in prize campaigns, play mini-games to earn points/medals, and view winners and promotions. Site references company ownership and provides FAQ, contact and terms pages.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://www.dreammail.jp/

What dreammail.jp served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

What the site presents is a Japanese consumer sweepstakes and rewards portal offering prize campaigns, mini-games, and a points-based “medal” system that enables participation in promotions. Its apparent business model is promotional and loyalty-oriented, supported by advertising, sponsored campaigns, partner offers, and member registrations rather than investment services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent promotional service, including prize campaigns, winner announcements, games, and medal-based entries, with no detected phishing, brand-impersonation, credential-harvesting, or malicious behavior indicators. The site's long registration continuity, clean external reputation results, and consistent page content support an established-site interpretation, although they do not independently prove the real-world operator's identity.

EVIDENCE

- The homepage identifies a prize and rewards service offering cash, gift cards, consumer goods, lottery-related promotions, games, and winner announcements.
- Browser inspection found no login form, hidden form, external password form, wallet connection, clipboard manipulation, cloaking, or suspicious inline script.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain was registered on 2001-03-26 and is approximately 25.41 years old.

Regulatory Verification Notes

The available FAQ, contact, and terms pages provide a basic customer-support and rules framework, and the homepage states that the service is operated by a listed-company group. That statement is an on-site representation rather than independent confirmation of the legal operator. No licensing or registration number is presented in the supplied content; for a promotional rewards service, this is a transparency and regulatory-verification point rather than evidence of impersonation or fraud. The use of standard domain-validated transport encryption supports technical integrity but does not establish corporate identity or regulatory status.

EVIDENCE

- The homepage, FAQ, contact, and terms pages are present and describe the service, participation mechanics, and support routes.
- The homepage states that the site is operated by a listed-company group; independent operator identity remains unverified.
- The site's TLS certificate uses DV validation, is issued by Amazon RSA 2048 M01, and is valid through 2026-12-29T23:59:59+00:00.
- The site has a strong global traffic footprint, appearing within the top one million sites at rank 9576.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the legal entity named in the terms and contact materials against the relevant corporate or consumer-protection records. Participation rules, eligibility conditions, prize-fulfilment procedures, and any payment or advertising-related terms should also be reviewed, with payment-protection methods retained for any transaction. Official contact channels should be confirmed through an independent route rather than relying solely on information presented on the site.

EVIDENCE

- The terms and contact pages are the appropriate locations for confirming the responsible legal entity and participation conditions.
- The homepage lists campaigns with different medal requirements, prize values, closing dates, and winner announcements, making the applicable rules material to participation.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate, low-risk website and supports the authoritative high-trust classification. No scam, phishing, impersonation, or identity-contradiction signal was identified, but the real-world operator connection remains unverified.

Infrastructure Integrity

The site is protected by AWS CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identified origin candidates. This provides a meaningful layer of exposure mitigation, but protective hosting remains a technical control and is not proof of operator legitimacy.

EVIDENCE

- The site is served from AS16509, Amazon.com, Inc., with observed edge addresses 35.75.169.67, 35.75.41.41, and 54.178.208.140.
- The infrastructure records identify Amazon-02 as the hosting provider and AWS as the CDN/WAF provider; three edge IPs were observed and zero likely origin IPs were identified.

Closing Assessment

The site may be considered for ordinary browsing and participation after the independent entity, rules, and payment-protection checks described above; credentials and payments should follow only after those routine checks are satisfactory.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dreammail.jp.

- The request stayed on dreammail.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-06.com, across 4 name servers. NOTED
- The registration is paid up to 2027-03-31. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dreammail.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
