

Is drivethrurpg.com legit? TrustSniffer's high-trust assessment: 95/100

drivethrurpg.com

Verdict

95

OUT OF 100

HIGH TRUST

drivethrurpg.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Cloudflare Error 1005 states that drivethrurpg.com has blocked the visitor's autonomous system number. The underlying website content and business model are not visible.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established online content site whose homepage currently presents visitors from the assessed network with an access-denied response; the underlying catalogue, services, and commercial model were therefore not displayed in the captured session.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation signals were observed. The long-established domain, extensive archival record, meaningful global traffic footprint, and clean external threat reputation converge strongly against a scam or impersonation interpretation. The access restriction is an infrastructure policy applied to the assessing network rather than evidence of deceptive behavior.

- The domain registration record shows registration on 25 February 2004 (~22.44 years old), through GoDaddy.com, LLC, with expiry on 25 February 2027.
- The web archive records 1,868 snapshots from 9 June 2004 to 26 July 2026, spanning 23 tracked years; no suspicious repurposing or semantic drift was established.
- External reputation assessment recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and no matching threat signatures.
- The domain holds a global traffic rank of 36,406 and is within the top one million sites.

Regulatory Verification Notes

The captured homepage was an access-control response and did not expose the site's legal, identity, or licensing pages. Consequently, the available page evidence does not support a substantive regulatory assessment, but this collection condition must not be interpreted as an absent disclosure or adverse regulatory finding. No conflicting legal-entity names or third-party broker match were identified.

- The captured homepage was classified as an "Access Denied / Error Page" and contained no underlying business or legal content.
- The captured page made no license claim and displayed no license authority or registration number; because the underlying site content was inaccessible in this session, this is not evidence that such disclosures are absent from the website.
- The available third-party broker dataset produced no match for the site.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 26 September 2026.

What to Verify Next

Where institutional onboarding or regulated procurement requires documentary assurance, the operative terms, privacy notice, contracting-entity details, and any representations relevant to the intended transaction should be reviewed through an ordinarily permitted network. Official contact channels can be confirmed independently when establishing a commercial relationship.

- The homepage response stated that the visitor’s autonomous system had been restricted under Error 1005.
- The captured homepage exposed no internal navigation links through which legal or identity pages could be examined.
- No forms, sensitive-input fields, hidden forms, or untrusted form destinations appeared in the captured response.
- Two completed behavioral runs found no cloaking, clipboard interference, wallet interaction, hidden sensitive forms, or suspicious inline scripts.

Summary Verdict

The site presents a high-trust, established profile with strong historical continuity, clean reputation evidence, and no contradictory fraud indicators. It is assessed as legitimate and trustworthy; normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, with all six observed addresses belonging to edge infrastructure and no origin candidate exposed during the assessment. This configuration reduces direct origin exposure and provides a meaningful security mitigation, although infrastructure protection alone is not evidence of business legitimacy.

- The site is served from AS13335 (Cloudflare, Inc., US); the observed server address was 104.26.2.2.
- Six unique Cloudflare edge addresses were observed, with no likely origin-server address identified.

Closing Assessment

Prospective users may engage with the site normally, while organizations conducting formal onboarding should apply their standard counterparty and documentation controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of drivethrurpg.com.

- The request stayed on drivethrurpg.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-25. NOTED
- The earliest public archive of this site is from 2004-06-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about drivethrurpg.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
