

Is drmarciovaleriano.com.br a scam? TrustSniffer's high-risk assessment: 0/100

drmarciovaleriano.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

drmarciovaleriano.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Clinic website for Dr. Márcio Valeriano presenting facial aesthetic surgeries (blepharoplasty, otoplasty), an advanced professional course (Ultrabotox), clinic locations, contact details and FAQs. Primary CTA is to schedule consultations via WhatsApp.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What drmarciovaleriano.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a medical-practice and professional-training site presenting Dr. Márcio Valeriano's facial aesthetic services, including blepharoplasty and otoplasty, together with the UltraBotox course for practitioners. Its apparent business model is consultation, surgery, and course-fee revenue, with appointment enquiries directed through WhatsApp and listed clinic locations.

Scam/Impersonation Risk

The site's presentation is internally consistent with a medical clinic: the homepage describes facial procedures, professional training, patient FAQs, clinic contact information, and a named practitioner, while observed page behavior showed no login form, hidden form, wallet connection, or credential-collection mechanism. However, this benign presentation is materially contradicted by strong external threat detections and confirmed blacklist status. No separate identity contradiction, phishing indicator, or brand-impersonation finding was observed, but the external reputation evidence is sufficient to make sensitive interaction inappropriate without independent validation.

EVIDENCE

- External reputation assessment recorded 13 malicious detections and 1 suspicious detection; Fortinet and Sophos were among the flagged security vendors.
- The domain is recorded as blacklisted by two external sources, with the malicious reputation signal treated as the decisive contradiction.
- Domain registration telemetry records 2025-01-03 as the creation date and an age of 1.63 years.

Regulatory Verification Notes

The about and homepage content identifies Dr. Márcio Valeriano and presents the professional-registration reference “CRM MG 41318,” but the available site material does not state a licensing authority, license number, or independently verifiable clinic authorization. This is a regulatory and disclosure gap rather than proof of a scam; nevertheless, the combination of medical services and paid professional training requires confirmation of the practitioner’s status and the legal basis for the services before engagement. The available identity evidence is consistent with a real person or practice but does not independently verify the operating entity. A broker-focused third-party dataset returned no match, which provides limited contextual reassurance but is not a licensing determination.

EVIDENCE

- Hosting telemetry records AS63410, operated by PRIVATESYSTEMS - PrivateSystems Networks, US.
- The site uses a Domain Validation TLS certificate issued by YR2, valid through 2026-11-04.
- The homepage identifies the practitioner as Dr. Márcio Valeriano and displays CRM MG 41318.

What to Verify Next

Before arranging treatment, enrolling in the course, or transmitting payment information, an independent check should confirm the practitioner’s professional registration and the clinic’s applicable authorization with the relevant Brazilian authority. Contact details should also be validated through an independently sourced clinic or professional channel rather than relying solely on the website’s booking route. Any payment should use a method offering meaningful dispute and consumer protection.

EVIDENCE

- The about and homepage content provide the professional name and registration reference that require independent registry confirmation.
- The contact and homepage pages establish the site’s booking and contact path, which should be reconciled with an independently obtained channel before sensitive engagement.

Summary Verdict

The website presents a credible-looking medical-practice profile, but its overall trust posture is critical because strong external threat detections and confirmed blacklist status outweigh the site’s otherwise coherent content and normal technical operation. The operator’s real-world identity remains only likely rather than independently verified, so the site should not be treated as trustworthy for sensitive interaction.

Infrastructure Integrity

The site resolves directly to a single likely origin address without a detected CDN or WAF layer. This reduces the availability of an additional protective edge layer and does not offset the external reputation findings; the hosting arrangement is a mitigating technical observation only, not evidence of legitimacy.

Closing Assessment

Restrict activity to non-sensitive observation until the independent identity, professional authorization, and contact-channel checks are completed; login, credential submission, and financial interaction should be avoided in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%
Trusted social count=2	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of drmarciovaleriano.com.br.

- The request stayed on drmarciovaleriano.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by webdivulgacao.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-03. NOTED
- The earliest public archive of this site is from 2021-12-01. CLEAR

- It is hosted on PRIVATESYSTEMS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about drmarciovaleriano.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
