- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents an online dermatology and aesthetic-clinic presence for Dr. Najjia Ashraf, offering consultations, laser treatments, fillers, surgery, skincare products, practitioner information, and appointment contact details for local patients in Karachi. Its apparent business model is to generate revenue through paid clinical and cosmetic services and related product sales.

Scam/Impersonation Risk

No contradictions were observed across the reviewed pages and technical signals: there were no phishing, impersonation, blacklist, or malicious-content indicators. The homepage and service pages describe a coherent healthcare business rather than an abuse-oriented or financial-solicitation model, and the site does not present login forms, wallet-connection features, or hidden sensitive forms. The available evidence is therefore consistent with an established, apparently legitimate site, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies Dr. Najjia Ashraf as a consultant dermatologist and laser therapist and provides dermatology, cosmetic, and appointment-related content.
- The service and product sections describe laser treatment, dermal fillers, aesthetic services, surgery, and body-care products without detected fraud indicators.
- The domain was registered on 2020-02-02 and is approximately 6.55 years old.
- Historical records run from 2010-10-10 to 2026-03-06, spanning 17 tracked years; snapshot-count data was not used because the historical collection output was internally inconsistent.

Regulatory Verification Notes

The site provides a practitioner name, clinical service descriptions, contact details, and appointment information, but the reviewed pages do not present a license number, licensing authority, or corporate registration detail. This is a regulatory-transparency item requiring independent confirmation, not evidence of a scam. The site's ownership information is privacy-protected as an administrative registration detail, while the clean page-level assessment, absence of detected malicious signals, and absence of an adverse broker match support the overall low-risk classification without independently proving the operator's identity.

EVIDENCE

- The homepage and practitioner-related content identify Dr. Najjia Ashraf and describe dermatology, laser, and cosmetic services.
- The contact and appointment content provides telephone and email channels for clinical enquiries.
- The site is served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- The transport certificate is issued by YR2, uses DV validation, and is valid until 2026-09-27 07:34:30 UTC.

What to Verify Next

Before a credential or payment interaction, an organization should independently confirm the practitioner and clinic identity through an offline or independently sourced channel. Applicable medical licensing and registration should be checked with the relevant Pakistani authority, and any product purchase should be assessed against clearly stated pricing, delivery, returns, and refund terms. Payment should use a method providing appropriate transaction protection.

EVIDENCE

- The reviewed site presents clinical and cosmetic services but no license number or licensing authority.
- The analyzed homepage returned successfully with HTTP status 200 in both observed runs.
- No login form, hidden form, password-external form, wallet connection, or wallet-drainer behavior was detected.

Summary Verdict

The available evidence supports a **high-trust, low-risk posture** for an established, apparently legitimate healthcare website. No contradictory scam or impersonation signals were identified, but the operator's real-world

identity is not independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, and the observed address was treated as an edge address rather than a directly exposed origin. This reduces routine infrastructure-exposure risk and is a mitigating control, but it is not independent proof of the site operator’s identity or legitimacy.

Closing Assessment

Normal informational use is proportionate; before submitting credentials or making payments, ordinary independent identity, transaction-protection, and commercial-policy checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of drnajjiaashraf.com.

- The request stayed on drnajjiaashraf.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by tezhost.com, across 2 name servers. NOTED
- The registration is paid up to 2029-02-02. CLEAR
- The earliest public archive of this site is from 2010-10-10. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about drnajjiaashraf.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
