

Is dstillery.com legit? TrustSniffer's high-trust assessment: 98/100

dstillery.com

Verdict

98

OUT OF 100

HIGH TRUST

dstillery.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate marketing page describing Dstillery's AI-powered audience targeting product (DS-1), capabilities, metrics from case studies, and contact/meetings CTAs. Includes privacy, cookie consent, and legal links.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Dstillery.com is a corporate B2B marketing website presenting Dstillery's AI-powered audience-targeting platform, including the DS-1 product, predictive modeling, lookalike audiences, programmatic advertising, case studies, and calls to arrange meetings or contact the company; its apparent business model is the sale of audience data and software-enabled advertising services to brands and agencies.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate product narrative rather than phishing, impersonation, or deceptive transactional content; available external reputation checks recorded no malicious or suspicious detections, and no brand-impersonation indicators were identified. A reputational signal involving reports against an observed network address is attributed to shared infrastructure rather than specifically to Dstillery, so it does not establish site-level malicious activity. The site's observed behavior also showed no login capture, hidden forms, password-external forms, wallet activity, clipboard interception, or cloaking.

EVIDENCE

- The homepage describes DS-1, predictive AI audience activation, custom audiences, lookalike modeling, and campaign-performance capabilities without identified fraud indicators.
- The domain was registered on 2013-07-10 and is approximately 13.09 years old.
- The observed address had 56 abuse reports attributed to shared infrastructure; the signal was associated with the network address rather than identified as a Dstillery-specific finding.
- Browser interaction observed two successful runs, with no hidden forms, password-external forms, wallet-provider detection, or cloaking.

Regulatory Verification Notes

The site appears structured for ordinary B2B commercial engagement and provides privacy, cookie-consent, and legal links, together with About, team, careers, and contact pathways. The available evidence does not independently verify the real-world operator identity, so the site should be described as apparently legitimate and evidence-consistent rather than identity-proven. No license claim or license number is presented in the supplied content; for an AI audience-targeting and advertising-data service, this is a transparency and

applicability-check point rather than evidence of a scam. Domain registration is through GoDaddy.com, LLC, while the registrant record uses private-registration services as an administrative arrangement.

EVIDENCE

- The homepage and site navigation provide About, Meet Our Team, Careers, Contact, privacy, cookie, and legal links.
- Domain registrar: GoDaddy.com, LLC; expiration date: 2028-01-28T11:59:59Z.
- Transport encryption uses a DV TLS certificate issued by YE1, valid to 2026-09-12T13:53:33+00:00.
- The page contains one contact-oriented form and no sensitive credential-collection form.

What to Verify Next

Before entering into a commercial relationship, an independent check should connect the site's stated business name and contracting entity to corporate records or an authoritative business source. The applicable privacy, data-processing, advertising, and contractual terms should be reviewed, particularly where first-party data, lookalike audiences, or shopper-behavior information would be supplied. Any payment or procurement process should use independently confirmed contact channels and standard contractual and payment protections.

EVIDENCE

- The homepage uses "Let's talk" and "Contact Us" calls to action for prospective commercial engagements.
- The site navigation exposes privacy, cookie-consent, and legal resources for review.
- The stated business model is B2B service and platform engagement rather than anonymous consumer payments or direct financial transactions.

Summary Verdict

Overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate corporate website, and no scam, phishing, impersonation, or identity-conflict indicators were observed. The principal remaining qualification is that the real-world operator identity is not independently verified by the supplied evidence.

Infrastructure Integrity

The site uses Cloudflare CDN/WAF protection and is served through an edge architecture, which is a meaningful exposure-mitigation control but does not independently prove legitimacy. The observed infrastructure is consistent with mainstream protected web hosting, and the origin server was not exposed in the analysis.

EVIDENCE

- Served from AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- Observed edge IP: 141.193.213.10; observed country: US; origin candidate count: 0.
- CDN/WAF vendor detected: Cloudflare; registry: ARIN.

Closing Assessment

Normal browsing and ordinary business engagement are proportionate to the assessed posture; before credential or payment interactions, prospective users should independently confirm the contracting entity, applicable commercial terms, and available payment protections.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 56 reports on hosting IP 141.193.213.10 (WPEngine, Inc., Content Delivery Network), 45% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dstillery.com.

- The request stayed on dstillery.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-01-28. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dstillery.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
