

Is dufourbit.com a scam? TrustSniffer's high-risk assessment: 3/100

dufourbit.com

Verdict

3

OUT OF 100

CRITICAL RISK

dufourbit.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-24 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page for 'Dufourbit', a forex/CFD broker offering leveraged trading, multiple account tiers with minimum deposits, zero-spread/promotional claims, and registration/login forms. Contact details and a company name are shown but registration number is placeholder-like. Risk disclosures present but structural verification information is weak.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Dufourbit is an online forex and CFD trading platform that presents leveraged access to financial markets, cryptocurrency trading, multiple account tiers, and registration and login facilities, with revenue apparently dependent on client-funded trading activity, spreads, commissions, and related account services.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradiction was observed, and the available identity signals consistently use the name Dufourbit. However, the site's operational offer creates substantial sensitive-interaction risk: the homepage advertises maximum leverage of 1:1000, 2,100-plus instruments, zero-spread or low-spread conditions, minimum-deposit account tiers, and cryptocurrency trading involving BTC and ETH. The site also presents registration and password-based login forms, while behavioral analysis detected hidden forms across both observed runs. These features, combined with deposit-before-service mechanics, aggressive performance or pricing claims, opaque value-flow concerns, and a placeholder-like registration reference, materially weaken confidence in using the platform for credentials or funds. The external checks did not identify an active blacklist or malicious classification, but that clean result does not resolve the site-specific concerns.

Evidence:

- The homepage presents registration and login forms and advertises 1:1000 maximum leverage, 2,100-plus instruments, zero funding fees, and execution claims of less than 13 milliseconds.
- The account and trading content describes minimum-deposit account tiers, low spreads beginning at 0.6 pips, and access to 70 currency pairs and BTC and ETH trading.
- Behavioral analysis detected hidden forms in 2 of 2 runs and identified password fields within the authentication surface.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing contradiction observed.

Regulatory Verification Notes

The site presents Dufourbit as its organizational identity and provides a contact form, but the available evidence does not independently verify the operator as a regulated financial entity. No license authority or license number is claimed, and the registration information is described as placeholder-like; this is a regulatory disclosure gap rather than evidence of impersonation. The available legal-page evidence is limited, with no privacy, terms, or policy pages identified among the analyzed site pages. Separately, the supplied protocol-recognition record independently recognizes dufourbit.com in a curated DeFi protocol registry, but it provides no protocol category or TVL, market-cap, or trading-volume figure. That recognition is a positive external identity signal, but it does not establish brokerage authorization or client-money protections. Evidence:

- The contact page identifies the organization as “Dufourbit” and provides a contact form, while no independently verified legal entity, regulator, or license number is supplied.
- The analyzed site fingerprint identifies no privacy, terms, or policy pages and records a placeholder-like registration reference in the site’s legal presentation.
- The domain was registered in 2026 and is administered through Name.com, Inc.
- The site’s transport encryption uses a DV certificate issued by WE1, valid through 2026-10-28.

What to Verify Next

Before any account creation or financial interaction, an institution should confirm the exact legal entity, jurisdiction, and authorization status directly against the relevant financial-services regulator’s register. The stated registration details and client-money arrangements should be validated through independent corporate and regulatory records rather than through the site’s own contact form. Payment, withdrawal, dispute, and account-closure terms should also be obtained and reviewed, with official contact channels confirmed through an independent route before sensitive information is exchanged. Evidence:

- The homepage and contact page provide on-site identity signals but do not supply an independently confirmed regulated-entity record.
- The site presents sensitive registration and login functionality, making independent confirmation of the operator and authentication endpoint necessary before use.
- The site’s stated trading conditions and account requirements should be reconciled with written contractual, withdrawal, and client-asset terms.

Summary Verdict

The overall posture is **critical for sensitive interaction**. No direct impersonation or blacklist contradiction was observed, and independent recognition of dufourbit.com as a named DeFi protocol is a meaningful legitimacy signal; however, the supplied recognition record contains no category or TVL, market-cap, or trading-volume magnitude, and it does not offset the unresolved operator, regulatory, and transactional concerns. The available

evidence therefore supports treating the site as an unknown entity with materially elevated exposure for credentials and financial activity.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF infrastructure on AS13335, with all observed addresses belonging to Cloudflare edge services and no origin candidate visible in the analysis. This provides a useful protective layer against direct exposure and some abusive traffic, but it is an infrastructure mitigation only and does not validate the operator or the financial service.

Closing Assessment

The proportionate decision is to restrict activity to non-sensitive observation until independent legal, regulatory, authentication, and payment-channel checks are completed; account login, credential submission, deposits, and other financial actions should not proceed on the present evidence.

Written analysis generated 2026-08-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox, page content.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The page contained a form a visitor cannot see.
Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS
 - The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE

Identity verification

Status	LIKELY
Identity score	70/100
Identity verification confidence	72%
- org:Dufourbit - contact:form - on_site_identity	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dufourbit.com.

- The request stayed on dufourbit.com. It was not redirected to another domain. CLEAR
- Registration is published under Name.com, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-03. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dufourbit.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
