

Is duhosting.tz legit? TrustSniffer's high-trust assessment: 96/100

duhosting.tz

Verdict

96

OUT OF 100

HIGH TRUST

duhosting.tz appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 70%.

What this site appears to be

DUHosting Tanzania markets paid .TZ domain registration, web hosting, VPS, email, SSL, backup, security, and reseller services. It presents detailed pricing and features alongside local telephone and email support, a Dar es Salaam address, policy links, and claims of registrar accreditation and a long operating history.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a commercial Tanzanian domain-registration and hosting platform offering .TZ domains, shared and VPS hosting, reseller services, business email, SSL certificates, backups, and website-security products through monthly or annual plans.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, confirmed malicious classification, or other substantive scam indicators were observed. The domain has a multi-year presence, its archived content shows no suspicious repurposing or semantic shift, and it maintains an established global traffic footprint. A single unconfirmed suspicious reputation classification does not outweigh the broader convergence of clean threat intelligence, stable site behavior, and coherent commercial content.

- The domain registration record shows registration in 2024 (~2.49 years old), through registrar REG-WADUDUH, with expiry scheduled for 2027.
- The web archive contains 7 snapshots spanning 2022–2026 (5 years tracked), with no detected suspicious repurposing or material category drift.
- External reputation checks recorded 0 malicious classifications, 1 isolated suspicious classification, no confirmed external listing, no search-browsing safety detection, and 0 infrastructure abuse reports.
- The homepage presented a consistent DUHosting identity and an established top-one-million traffic position at rank 152,973.

Regulatory Verification Notes

The homepage provides detailed pricing, a Dar es Salaam address, local telephone and email channels, policy links, and a claim of registrar accreditation. These disclosures support a coherent operating identity, although the supplied pages do not clearly establish the specific legal entity behind the service or document the authority and scope of the claimed accreditation. As this is a hosting and domain-services provider rather than an investment or brokerage platform, the absence of financial-services licensing is not adverse; the relevant verification question concerns corporate standing and registrar authorization. No matching broker-reputation record was identified, which has no material bearing on this business model.

- The homepage publishes a physical address in Dar es Salaam and provides local customer-support channels alongside service pricing.
- The homepage claims registrar accreditation and links to policy materials, but the reviewed content does not clearly state an accreditation number or accrediting authority.

- The site is served from AS51167 (CONTABO – Contabo GmbH, DE) in Germany.
- The site’s transport encryption uses a valid YR2-issued domain-validated TLS certificate, valid until 2026-10-02.

What to Verify Next

For vendor onboarding or material contractual commitments, the contracting legal name should be matched to Tanzanian corporate records, and the claimed registrar accreditation should be confirmed directly with the stated registry or accrediting authority. Procurement teams should also reconcile the published address and official contact channels with contractual and invoicing documentation. Standard account use is appropriate, with ordinary controls such as independently navigating to the known domain and enabling available account-security features.

- The homepage includes a client area with sign-in and registration pathways appropriate to an established subscription-service workflow.
- The three observed homepage forms were limited to domain search, currency selection, and support chat; none used an untrusted destination or exposed a sensitive form.
- Interactive testing completed successfully without cloaking, hidden forms, suspicious inline scripts, clipboard interference, cryptocurrency-wallet behavior, or credential submission to external destinations.

Summary Verdict

DUHosting presents as a legitimate, established, and trustworthy commercial website. Its coherent operating identity, substantive service catalogue, stable behavior, historical continuity, meaningful traffic presence, and predominantly clean external reputation provide strong, mutually reinforcing legitimacy evidence. Normal interaction, including account login and standard service use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin address hosted by Contabo, without a CDN or WAF edge layer. Direct origin visibility provides less network-layer shielding than a protected edge architecture, but the resolved infrastructure is attributable to a mainstream hosting provider and no confirmed abuse pattern was observed; this is a neutral architectural characteristic rather than evidence against legitimacy.

Closing Assessment

Prospective customers may use the site normally, while institutional onboarding should apply routine supplier due diligence and contractual identity checks proportionate to the value and criticality of the intended service.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of duhosting.tz.

- The request stayed on duhosting.tz. It was not redirected to another domain. CLEAR
- Registration is published under REG-WADUDUH. CLEAR
- DNS for this domain is served by duhosting.tz, across 2 name servers. NOTED
- The registration is paid up to 2027-02-05. NOTED
- The earliest public archive of this site is from 2022-09-25. CLEAR
- It is hosted on CONTABO, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about duhosting.tz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
