Full analysis

Overview

Dutchie Dutch is a small informational website for the musical act “Dutchie Dutch,” presenting artist information, upcoming projects, news, music and videos, and booking options for performances or related services.

Scam/Impersonation Risk

No scam, phishing, brand-impersonation, blacklist, or conflicting-identity contradiction was observed. The homepage and associated content present a coherent entertainment and booking purpose, with no visible login, payment, credential-collection, cryptocurrency, wallet-connection, or other high-risk interaction. Observed browser behavior was also consistent with a conventional informational website rather than a site preparing abusive or deceptive actions. The available evidence therefore supports a low scam/impersonation concern, while independently confirming the real-world operator remains appropriate before commercial engagement.

EVIDENCE

- The homepage identifies “Dutchie Dutch – The home of Team Dutch” and links to About, Upcoming Projects, News, Music & Videos, booking services, and performance booking.
- The site’s observed forms analysis recorded no forms, no sensitive form, and no login form; browser testing recorded no external posts, wallet activity, clipboard activity, hidden forms, or cloaking.
- Archive provenance records first observation on 2018-08-07 and last observation on 2026-05-10, with 9 years tracked; the historical coverage is sparse but contains no reported repurposing or semantic drift.

Regulatory Verification Notes

The site appears to operate as an entertainment and booking presence rather than as a financial or otherwise regulated service. No licensing claim or license number is recorded, so the relevant verification issue is limited to confirming the contracting party and any applicable booking terms; this is not, by itself, evidence of misconduct. The available evidence is consistent with an established website: the domain is long-established, the evaluated reputation signals contain no malicious findings, the site operates stably, and the domain is registered through DREAMHOST. A separate broker-dataset check produced no match, which is contextual reputational information rather than a regulatory determination. The real-world operator identity is not independently verified.

EVIDENCE

- Domain registration: 2016-07-16; age 10.1 years; registrar DREAMHOST.
- The site is hosted on AS26347, DREAMHOST-AS – New Dream Network, LLC, US.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-02.
- Evaluated external checks recorded 0 malicious results, 0 suspicious results, and 0 AbuseIPDB reports; reputation coverage was partial.

What to Verify Next

Before a booking, merchandise purchase, or other payment interaction, the prospective counterparty should be confirmed through an independent channel associated with the act or venue. The About and booking/contact pages should be checked for the contracting legal name, cancellation or return terms, performance obligations, and payment destination. Any payment should use a method offering appropriate transaction protection, and credentials should not be reused from other services.

EVIDENCE

- The site includes dedicated About, booking-services, and performance-booking areas that can be used to establish the commercial counterparty and engagement terms.
- The available page analysis describes the site as informational and booking-oriented, with no visible payment or credential-collection form.
- The site is built on WordPress using the Astra theme and was observed returning stable successful page responses.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate informational website and supports a high-trust, low-risk posture. No scam or impersonation contradictions were observed, but the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site resolves to hosting operated by New Dream Network, LLC in the United States, with no CDN, WAF, or separate edge/origin arrangement identified in the supplied infrastructure evidence. The hosting and stable transport-encryption posture provide useful technical mitigation, but infrastructure protection alone does not establish the operator’s identity or legitimacy.

Closing Assessment

Routine browsing is proportionate to the observed risk posture; before credentials or payment details are exchanged, ordinary independent checks of the merchant identity, applicable terms, and payment protections should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dutchiedutch.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
