

Is duxsoftware.com.ar legit? TrustSniffer's high-trust assessment: 90/100

duxsoftware.com.ar

Verdict

90

OUT OF 100

HIGH TRUST

duxsoftware.com.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing and pricing landing page for Dux Software, a commercial management (ERP/POS) SaaS targeting SMEs. Presents features, integrations, pricing tiers, testimonials, and calls-to-action for demos and account creation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Dux Software is a commercial SaaS website for small and medium-sized businesses, presenting an ERP and point-of-sale platform intended to manage sales, inventory, electronic invoicing, cash registers, integrations, pricing, demonstrations, and account creation through a subscription-based model.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-reputation indicators. The homepage presents a coherent business-software offering rather than an abuse-oriented service, including real-time stock control, POS operations, electronic invoicing integrated with AFIP/ARCA, and connections with Mercado Libre, Tiendanube, and Mercado Pago. Its calls to action are consistent with a SaaS sales process, and observed behavior showed no login phishing form, hidden sensitive form, wallet connection, clipboard hijacking, cloaking, or suspicious inline script. The site therefore appears legitimate and established, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage describes Dux Software as a commercial management system for SMEs and provides consistent product features, pricing, demonstrations, and account-creation paths.
- The homepage claims that more than 4,500 SMEs use the service and identifies integrations with Mercado Libre, Tiendanube, Mercado Pago, and AFIP/ARCA.
- Behavioral inspection recorded zero hidden forms, zero password submissions to external forms, zero wallet-provider detections, and no cloaking or suspicious inline scripts.
- External reputation checks recorded zero malicious and zero suspicious detections, with the domain present in the global top-million traffic set.

Regulatory Verification Notes

The site presents a conventional commercial software model rather than a regulated financial service, and no third-party broker match or adverse reputational signal was identified. Available content supports an apparently legitimate operating presence, but it does not independently establish the legal entity behind the service or provide a verified licensing or registration reference. This is a transparency and verification matter, not evidence of scam activity. The domain is registered through nicar, and its long registration continuity, sustained archival presence, valid transport encryption, and stable technical delivery materially support the assessment that the website is established.

EVIDENCE

- Domain registration: 2015-02-03; age 11.53 years; registrar nicar; expiration 2027-01-27.
- Web archive: 112 snapshots spanning 2017-01-31 through 2026-05-13, covering 10 years with a maximum observed gap of 1 year.
- Hosting telemetry: served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS telemetry: certificate issued by WE1, validation level DV, valid to 2026-10-03T18:15:12+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant's legal identity, applicable business registration, and the entity responsible for billing and support. The subscription terms, cancellation provisions, renewal mechanics, refund treatment, and payment-protection options should also be reviewed through the site's pricing, account, and support workflows. Where invoicing or tax compliance is material, the relevant AFIP/ARCA integration and the applicable local requirements should be confirmed independently.

EVIDENCE

- The homepage links to dedicated pricing, account-creation, login, demonstration, company-information, resources, and support-related paths.
- The commercial model is presented through monthly subscription pricing and calls to action for demonstrations and account creation.
- The site identifies AFIP/ARCA-related electronic invoicing functionality, making independent confirmation of the applicable invoicing arrangement relevant to prospective business customers.

Summary Verdict

The website has a high-trust, low-risk posture and the available evidence is consistent with an established, apparently legitimate SaaS provider. No scam, phishing, impersonation, or other contradictory signal was identified, while operator identity verification remains incomplete.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure and resolves through Cloudflare edge addresses rather than a directly exposed origin. This reduces direct origin exposure and is a positive defensive signal, but it remains a mitigating infrastructure characteristic rather than proof of business legitimacy.

Closing Assessment

Standard browsing and ordinary evaluation are proportionate; before entering credentials or making payments, the prospective customer should complete the independent merchant-identity, contractual, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of duxsoftware.com.ar.

- The request stayed on duxsoftware.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-27. NOTED
- The earliest public archive of this site is from 2017-01-31. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about duxsoftware.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
