

Is dysman.com a scam? TrustSniffer's high-risk assessment: 5/100

dysman.com

Verdict

5
OUT OF 100

CRITICAL RISK

dysman.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Dysman Establishment (UAE HVAC company). Contains company overview, services (engineering, installation, maintenance, commissioning, IAQ), contact details (phone, email, PO Box), and partner mentions. No login, financial solicitations, or crypto/payment requests detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://dysman.com/>

What dysman.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Dysman.com presents itself as the corporate website of Dysman Establishment, a UAE-based HVAC and air-cooling contractor offering engineering, installation, commissioning, maintenance, repair, and indoor-air-quality services to commercial and industrial clients through project engagements and service agreements.

Scam/Impersonation Risk

The site's stated business purpose and page content do not themselves show a phishing form, login mechanism, financial solicitation, cryptocurrency feature, or brand-impersonation pattern. However, this benign presentation is materially contradicted by external threat intelligence: the domain is reported as malicious by multiple detections and is subject to confirmed blacklist listings. These contradictions are sufficiently significant that the website should not be treated as safe for sensitive interaction, even though its visible content resembles a conventional corporate HVAC site. Historical provenance is also not fully conclusive: archival intelligence records the domain as present from 2018, while the current registration record dates from 2025; the archival assessment found no detected semantic repurposing or suspicious category change.

EVIDENCE

- The homepage describes Dysman Establishment, HVAC engineering and installation, maintenance and repair, building commissioning, and indoor-air-quality services.
- Automated page inspection found no login form, hidden sensitive form, wallet connection, external password form, or financial solicitation on the homepage.
- External reputation telemetry recorded 5 malicious and 2 suspicious detections from 7 evaluated results, with confirmed blacklist status.
- Historical records show first observation on 2018-08-06 and last observation on 2025-07-11, covering 8 years; no suspicious repurposing was identified.

Regulatory Verification Notes

The company and about pages identify the business as “Dysman Establishment” and describe a long operating history in the UAE HVAC sector, but the available evidence does not independently verify the real-world operator behind the domain. The pages describe services and partners rather than presenting a verifiable licensing or registration number, so regulatory status remains a matter for independent confirmation rather than an established fact. The absence of a matching broker record is only contextual and does not provide legal, licensing, or regulatory assurance.

EVIDENCE

- The homepage identifies “Dysman Establishment” and states that the business was founded in 1975.
- The company pages describe commercial and industrial work across sectors including oil and gas, marine, healthcare, defense, food and beverage, logistics, and events.
- No license authority or license number is claimed in the available business-model evidence.
- The site’s page-authority signal is in the low band, while the visible content is categorized as business/corporate.

What to Verify Next

Before any sensitive engagement, the claimed establishment should be confirmed through an independent UAE corporate or commercial registry and any applicable HVAC, engineering, safety, or contracting authority. The telephone number, physical address, project references, and partner relationships should be validated through independently sourced records rather than relying solely on the website. Any proposed contract or payment should use a protected commercial process with verified beneficiary details and contractual recourse.

EVIDENCE

- The contact page provides a telephone number, email address, and PO Box for independent cross-checking.
- The company pages identify suppliers, partners, clients, and project activity that can be validated through separate corporate channels.
- The available evidence does not contain a license authority or registration number for registry matching.
- The homepage contains no account, payment, or sensitive-data form, so any later request for such information would represent a material change in interaction profile.

Summary Verdict

The overall posture is **critical trust risk**. The website's corporate presentation is not sufficient to overcome the confirmed external threat contradictions, and the operator's real-world identity remains unverified. Sensitive interaction should therefore be treated as inappropriate absent independent clearance.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, which provides a mitigating layer against direct exposure but does not establish legitimacy; the origin server was not observable in this analysis. The observed edge address resolves to IONOS infrastructure in the United Kingdom.

EVIDENCE

- Served from AS8560 (IONOS-AS – IONOS SE, DE); observed IP: 77.68.122.68.
- The infrastructure record identifies one CDN edge IP and zero observable origin candidates.
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-05T16:26:06+00:00.

Closing Assessment

Use should be restricted to passive viewing while the claimed business identity, regulatory standing, and any proposed transaction are independently validated; account access, credential submission, and financial activity should not proceed on the basis of the website alone.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dysman.com.

- The request stayed on dysman.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-04-04. [NOTED](#)
- The earliest public archive of this site is from 2018-08-06. [CLEAR](#)
- It is hosted on IONOS-AS, from a server in GB. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dysman.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
