Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Dziennik Zachodni is a Polish regional news and media website presenting local and national news, sports, business, culture, weather, and advertising or promotional content. Its apparent business model is that of an established publisher funded primarily by advertising, sponsored material, partner promotions, and potentially subscription or electronic-edition sales.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent regional-news service rather than a credential-harvesting, investment, or transactional impersonation scheme, and the content analysis found no phishing, brand-impersonation, malware, or other immediate fraud indicators. External reputation checks were clean, while the site's substantial historical continuity and established publishing model provide convergent support for an apparently legitimate website; this does not independently verify the real-world operator identity.

EVIDENCE

- The homepage is titled “Dziennik Zachodni - Wiadomości Śląsk, Wiadomości Śląskie” and contains substantive regional-news, sports, business, culture, and weather content.
- Domain registration records show registration in 2005, with an age of 21.48 years.
- Web-archive history records 5,000 snapshots spanning 2003–2021, with 19 years tracked.
- External checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist hit.

Regulatory Verification Notes

The site operates as a news publisher rather than presenting a regulated financial or investment service. Its privacy-consent content identifies “Polska Press” and “Pro Media” as personal-data administrators and describes cookie use, personalization, advertising, analytics, and data-subject rights. No regulated-service license or registration number is presented in the supplied site content; for this business model, that is a transparency item for confirmation rather than evidence of deceptive conduct. The available evidence is consistent with an established, apparently legitimate website, but the operator's real-world identity is not independently verified.

EVIDENCE

- The homepage privacy notice identifies Polska Press and Pro Media as data administrators and provides consent-management and privacy-rights language.
- The site's transport encryption uses a DV certificate issued by YE1, valid to 2026-10-12.
- Hosting telemetry identifies AS34409, POLSKAPRESS-AS - Polska Press Sp. z o.o., PL.
- No match was recorded in the available broker-reputation context.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the relevant merchant or publisher identity, review the applicable privacy and service terms, and ensure that any subscription or electronic-edition purchase is covered by suitable payment protections. Where a regulated activity is later offered, its authorization should be checked directly against the relevant official registry. Official contact channels should also be confirmed through an independently obtained source rather than relying solely on page content.

EVIDENCE

- The homepage contains a privacy and cookie-consent flow with controls for changing consent preferences.
- The analyzed page contained no login form, sensitive form, hidden form, or untrusted form destination.
- The site returned stable successful responses across both completed behavioral runs.
- The page analysis classified the site as News / Local Media with a low content-risk profile.

Summary Verdict

The overall posture is high trust and low risk, with the evidence strongly consistent with an established and apparently legitimate regional publisher. No scam, phishing, impersonation, or other contradictory signal was identified. The remaining qualification concerns independent confirmation of the real-world operator, not an observed indication of malicious activity.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than identified origin candidates. This provides a meaningful mitigation against direct origin exposure and common availability or abuse patterns, but protective infrastructure alone is not proof of organizational legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before submitting credentials or making a payment, ordinary independent checks of identity, terms, and payment protection should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dziennikzachodni.pl.

- The request stayed on dziennikzachodni.pl. It was not redirected to another domain. CLEAR
- Registration is published under OVH SAS. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-21. NOTED
- The earliest public archive of this site is from 2003-05-26. CLEAR
- It is hosted on POLSKAPRESS-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dziennikzachodni.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
