Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the institutional homepage of Ecole Polytechnique d'Agadir within Universiapolis, presenting a private higher-education institution offering preparatory studies, engineering degrees, and international master's programs supported primarily by tuition-based enrolment.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive forms, or other fraud signals were observed. The named institution aligns with the domain registration record, while the homepage presents coherent academic content, admissions pathways, campus activities, and institutional news. The long-established domain and clean external reputation materially support the site's legitimacy.

- The domain registration record names "Ecole polytechnique Privée d'Agadir" as the owner and AFOULKI INTERNATIONAL as registrar.
- Registered 2011-10-31 (~14.76 years old), with registration valid to 2026-10-31.
- The homepage identifies the site as "Ecole Polytechnique d'Agadir - Universiapolis"; automated inspection found no login form, hidden form, untrusted form destination, cloaking, or suspected brand impersonation.
- Reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and placement within the top 1,000,000 globally at rank 721,702.

Regulatory Verification Notes

The homepage describes the school as a private higher-education institution recognized by the Moroccan state and identifies engineering disciplines including computer, civil, industrial, electrical, mechanical, and agri-food engineering. The supplied page does not display a supporting recognition reference, accreditation identifier, or licensing authority record; this is a limited disclosure point rather than evidence of misrepresentation. No adverse broker-related match was identified, although such context does not establish educational authorization.

- The homepage expressly describes Ecole Polytechnique d'Agadir as a private higher-education institution "recognized by the State."
- The homepage presents preparatory, engineering, and international master's programs and provides admissions information and an institutional brochure.
- The supplied homepage content contains no stated license number, accreditation reference, or named registry entry.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid to 2026-10-27.

What to Verify Next

Institutional onboarding or high-value tuition commitments should follow ordinary educational due diligence: confirm the school's recognition and each relevant program through the competent Moroccan education authority, establish whether a selected qualification carries program-specific accreditation, and reconcile payment instructions with independently confirmed institutional channels. Admissions terms, tuition, refund conditions, and the awarding institution for international programs should be obtained in writing.

- The homepage invites prospective students to review admissions procedures and download an institutional brochure.
- The homepage advertises both engineering degrees and international master’s programs, making program-level recognition and awarding arrangements relevant.
- The homepage publishes institutional contact details in Agadir, providing a basis for independent confirmation of admissions and payment instructions.

Summary Verdict

This is a legitimate, established, and trustworthy institutional website with a coherent identity, mature operating footprint, clean threat reputation, and substantive academic content. No contradictory evidence undermines its stated purpose. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s mainstream CDN/WAF service. All four observed addresses were Cloudflare edge nodes and no origin candidate was exposed, which reduces direct infrastructure exposure but is treated as a security control rather than independent proof of institutional legitimacy.

- Served through AS13335 (CLOUDFLARENET — Cloudflare, Inc., US), with four observed CDN edge addresses.
- The observed hosting configuration exposed 0 likely origin addresses.

Closing Assessment

Prospective students and institutional counterparties may use the site normally, applying standard enrolment and payment due diligence appropriate to private higher education.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about e-polytechnique.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
