

Is e-skafos.gr safe? TrustSniffer's moderate-trust assessment: 65/100

e-skafos.gr

Verdict

65
OUT OF 100

MODERATE TRUST

e-skafos.gr is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Greek-language classifieds site (e-skafos.gr) focused on new and used boats, yachts, engines and marine accessories. Contains listings, search filters, recent updates, contact info and links to social profiles.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Safe for Read-Only.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Greek-language online classifieds marketplace for new and used boats, yachts, engines, marine accessories, and related marine services. It presents searchable listings, category and price filters, seller updates, registration and login links, contact information, and links to social profiles; its apparent business model is listing, advertising, and promoted-placement activity.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-content, or confirmed abuse indicators. The homepage presents a coherent marketplace purpose rather than a deceptive conversion flow, and its forms are limited to search functionality with registration and login links rather than an observed credential-collection form. Technical behavior did produce a limited caution signal through two suspicious inline scripts, non-whitelisted external requests and posts, and console errors; however, the same assessment found no hidden forms, wallet activity, clipboard manipulation, cloaking, or password submission to external destinations. These observations support ordinary caution around dynamic interactions without establishing scam or impersonation activity.

EVIDENCE

- The homepage describes listings for new and used boats, yachts, jet skis, marine engines, spare parts, trailers, and accessories, with search and price filters.
- The homepage behavior assessment recorded no login form, hidden form, password-external form, wallet activity, clipboard manipulation, or cloaking.
- The site's observed behavior included 2 suspicious inline scripts, 14 external XHR requests, 5 external posts, and 8 console errors.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or phishing hit for the site.

Regulatory Verification Notes

The site appears to operate as a marketplace rather than presenting itself as a regulated financial or investment service. The supplied page evidence does not show a license claim, license number, or regulatory authority, so the principal verification issue is disclosure clarity rather than evidence of fraud. The site's real-world operator is only likely, not independently verified; social links to Facebook, Twitter, and Skype provide contextual identity signals but do not prove the legal entity behind the marketplace. No matching broker entry was identified in the supplied third-party reputational context, which is a neutral supporting signal and not a licensing determination.

EVIDENCE

- The homepage is categorized as a classifieds and marketplace service for boats and marine equipment, with a standard ecommerce-type business model.
- The available site content contains no stated license authority or license number.
- The homepage provides contact information and links to Facebook, Twitter, and Skype.
- The supplied third-party broker context returned no match.

What to Verify Next

Before a high-value purchase or payment, the prospective counterparty should be independently checked through the relevant business or commercial registry, and ownership of the specific boat, engine, or accessory should be confirmed through original documentation and an inspection. Payment should use a protected method with dispute or escrow capability, while seller contact details and transaction terms should be confirmed through independently sourced channels rather than relying solely on the listing. Any account use should be limited to the information necessary for the intended transaction, with credentials unique to this service.

EVIDENCE

- The marketplace displays individual listings and seller or service-provider names, creating a need to validate the specific counterparty and advertised asset.
- The site provides registration and login links, but the supplied evidence does not independently verify the operator's legal identity.
- The business model is marketplace-based, with revenue likely derived from listings, advertising, and promoted placements rather than a verified regulated-service framework.

Summary Verdict

The website has a **moderate-trust posture**: its apparent marketplace function is coherent, its content is substantive, and no direct scam or impersonation contradiction was identified. Legitimacy is evidence-consistent and likely, but the operator’s identity is not independently proven, so the site is best regarded as suitable for browsing and routine low-exposure interaction while requiring additional assurance for consequential transactions.

Infrastructure Integrity

The site resolves directly to hosting operated by IOMART Cloud Services Limited in the United Kingdom, without a detected CDN or WAF layer. This provides an identifiable hosting context but limited intermediary protection; infrastructure characteristics should therefore be treated as contextual mitigation rather than proof of legitimacy.

EVIDENCE

- Hosted on AS20860, IOMART-AS – IOMART Cloud Services Limited, GB; resolved address: 95.154.234.68.
- The infrastructure assessment identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS certificate validation level: DV; issuer: YR2; valid to 2026-10-01T02:24:03+00:00.
- No CDN or WAF vendor was detected.

Closing Assessment

The appropriate course is normal browsing and limited account use, with independent counterparty, asset, and payment-protection checks completed before any high-value or sensitive transaction.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by behaviour in a sandbox.

01 Dynamic Interaction Caution

- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE

Identity verification

Status	LIKELY
Identity score	76/100

Identity verification confidence	76%
----------------------------------	-----

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of e-skafos.gr.

- The request stayed on e-skafos.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2008-03-28. CLEAR
- It is hosted on IOMART-AS, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about e-skafos.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
