

Is e-tesda.gov.ph legit? TrustSniffer's high-trust assessment: 90/100

e-tesda.gov.ph

Verdict

90
OUT OF 100

HIGH TRUST

e-tesda.gov.ph appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Institutional online learning portal (TESDA Online Program) built on Moodle. Provides course listings, enrollment calls-to-action, login and account creation links, and informational pages such as FAQs and policies.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

e-tesda.gov.ph presents itself as the TESDA Online Program, an institutional Moodle-based learning portal offering vocational and technical course listings, enrollment, account creation, login access, FAQs, instructional materials, videos, news, and library resources.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-content, or conflicting-identity indicators. The homepage's course catalogue, sector listings, enrollment calls to action, FAQs, and Moodle account functions form a coherent education-service model rather than a deceptive financial or investment solicitation. The apparent institutional identity is supported by the government-sector domain context and sustained historical continuity, although the real-world operator has not been independently verified.

EVIDENCE

- Homepage content identifies the service as the TESDA Online Program and presents courses, enrollment, account creation, FAQs, videos, and learning resources.
- The domain was registered in 2007 and is approximately 19.27 years old.
- The site has 1,318 archive snapshots spanning 2007-05-04 through 2026-07-18, with 20 years tracked.
- Available external reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist hit reported.

Regulatory Verification Notes

The site's education-focused purpose and government-sector domain provide a credible context for its apparent legitimacy, and the About, FAQ, policy, and enrollment materials should be read as operational disclosures rather than as proof of a separately verified legal operator. No education-sector license or registration number is claimed in the supplied site evidence; this is a transparency item for confirmation, not evidence of a scam. The site uses a valid domain-validated TLS certificate from a known issuer, which supports transport integrity but does not independently establish the operator's legal identity.

EVIDENCE

- The homepage identifies the platform as “TESDA ONLINE PROGRAM” and links to About, FAQs, How To, Videos, News, library, and policy resources.
- The site's TLS certificate is issued by Amazon RSA 2048 M04, uses DV validation, and is valid through 2026-11-28T23:59:59+00:00.
- The homepage provides login and account-creation functions but does not, in the supplied content, state a license number or separate legal-entity registration.

What to Verify Next

Before credential or payment interactions, independently confirm that the portal is linked from an official TESDA communication channel and that the relevant support or enrollment contacts are authentic. Review the privacy notice, terms, payment arrangements, refund or cancellation provisions, and any applicable course-provider disclosures. Where fees or sensitive personal information are involved, confirm the merchant identity and use payment methods offering appropriate transaction protection.

EVIDENCE

- The homepage links to privacy and policy resources and displays a data-retention summary.
- The portal exposes standard login and signup functions, making independent confirmation of the official access channel appropriate before credential submission.
- The supplied business-model evidence describes education and enrollment rather than direct monetary investment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk educational website. Its coherent institutional purpose, clean technical and reputational signals, and sustained presence support a high-trust posture, while the connection between the website and a specific real-world operator remains independently unverified.

Infrastructure Integrity

The site is served through AWS CDN/WAF infrastructure using Amazon Technologies Inc. hosting on AS16509, with observed edge addresses rather than a directly exposed origin. This is a mitigating security-control signal that can reduce routine infrastructure exposure, but it is not proof of ownership or legitimacy.

Closing Assessment

Normal educational browsing and enrollment research are proportionate, while credentials or payments should follow the ordinary independent identity, policy, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of e-tesda.gov.ph.

- The request stayed on e-tesda.gov.ph. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2007-05-04. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about e-tesda.gov.ph at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
