

Is e-evolution.ai legit? TrustSniffer's high-trust assessment: 100/100

e-evolution.ai

Verdict

100

OUT OF 100

HIGH TRUST

e-evolution.ai appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate product site for e-Volution, an AI-driven Connected TV monetization platform targeting publishers with claims of revenue uplift, low-latency decisioning and transparent reporting. Contains contact/demo request CTA and company overview.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

e-evolution.ai is a corporate product website for e-Volution, an AI-driven Connected TV advertising technology platform that helps publishers optimize inventory yield, manage real-time bidding, and obtain reporting through an enterprise SaaS and revenue-sharing model.

Scam/Impersonation Risk

No contradictions were observed: external reputation checks identified no malicious or suspicious detections, no phishing or impersonation indicators were present, and the site's behavioral profile showed no hidden forms, wallet activity, cloaking, or suspicious external network activity. The homepage presents a coherent B2B SaaS proposition rather than a deceptive consumer-facing offer, although its marketing claims—including average revenue uplift of 47%, more than 1.2 billion daily auctions, and sub-50ms ad decisioning—remain commercial claims that should be assessed through normal vendor due diligence rather than treated as independently verified performance evidence.

EVIDENCE

- The homepage describes CTV monetization, AI-powered yield optimization, real-time bidding, dynamic floor pricing, analytics, and enterprise integration, with no detected red-flag content.
- The homepage contains a contact/demo request form and no login, payment, wallet-connect, or sensitive credential form.
- The domain registration record shows: Registered 2019-09-03 (~6.95 years old).

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate adtech/SaaS website, but the real-world operator identity is not independently verified. The site does not claim a financial-services license or provide a license number in the supplied content; for this stated publisher-focused SaaS model, that is a disclosure and vendor-onboarding matter rather than evidence of a scam. The site's professional positioning, clean external reputation, established registration, and stable encrypted hosting support a positive trust assessment, while the absence of independently verified legal-entity details limits certainty about the contracting party.

EVIDENCE

- The homepage identifies the business as e-Volution and presents a publisher-focused CTV monetization platform with a book-a-demo call to action.
- Hosting resolves through AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- The site's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-12-25.

What to Verify Next

Before a commercial engagement, the prospective customer should obtain the contracting entity's legal name, registered address, ownership details, service terms, data-processing terms, and applicable liability provisions directly from the company. The stated revenue-uplift and auction-volume metrics should be supported by customer references, defined measurement methodology, and contractually clear reporting obligations. Any payment or credential interaction should also be completed only after independent confirmation of the official contracting and support channels, together with review of payment protections and termination rights.

EVIDENCE

- The homepage provides a single contact/demo-request workflow rather than a transactional checkout or account-management interface.
- The stated business model is enterprise SaaS for publishers, likely involving service fees, revenue-share arrangements, or enterprise contracts.
- The homepage's marketing claims are quantitative but are not accompanied in the supplied content by independent validation or customer references.

Summary Verdict

The website presents a high-trust, low-risk posture and is apparently legitimate based on converging content, behavioral, reputation, registration, and infrastructure evidence. The classification supports ordinary business evaluation and engagement, while the operator's real-world identity remains unverified and therefore should not be treated as proven.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with the observed edge address associated with AS24940 and Hetzner Online GmbH; no origin candidate was observable in the analysis. This configuration is a mitigating exposure-control measure, not proof of legitimacy, and is consistent with a professionally operated web service.

Closing Assessment

Proceed with standard enterprise procurement and security due diligence, including independent counterparty confirmation and contractual review, before submitting credentials or payment information.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of e-volution.ai.

- The request stayed on e-volution.ai. It was not redirected to another domain. CLEAR
- Registration is published under EuroDNS S.A.. CLEAR
- DNS for this domain is served by awsdns-02.org, across 4 name servers. NOTED
- The registration is paid up to 2027-09-03. NOTED
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about e-volution.ai at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
