Full analysis

Overview

Eastvaal Motors is an established South African automotive dealership group offering new and used vehicles, vehicle finance enquiries, servicing, parts, dealership locations, specials, and customer contact options through a conventional automotive retail and lead-generation model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent dealership identity, extensive vehicle inventory, named vehicle brands, dealership locations, service functions, and standard enquiry channels. The site shows no phishing indicators, hidden forms, wallet activity, malware signals, or suspected brand impersonation; its commercial behavior is consistent with automotive retail rather than deceptive investment or credential-harvesting activity.

- Homepage: identifies Eastvaal Motors, states “Established 1968,” and presents new cars, used cars, servicing, parts, finance enquiries, and dealership locations.
- Homepage and contact flows: four standard vehicle, contact, and WhatsApp enquiry forms were observed, with no login form or hidden form detected.
- External reputation checks: 0 malicious and 0 suspicious detections, with no blacklist or phishing hit recorded.

Regulatory Verification Notes

The site’s stated business model is automotive dealership sales, financing referrals, servicing, and parts. The supplied pages do not establish a separate licensing or registration number for the dealership or finance-related activity; this is a transparency item for routine verification, not evidence of impersonation or fraud. No adverse broker-context match was present.

- Registration record: registered 2014-10-24, approximately 11.78 years old; registrar: xneelo (Pty) Ltd.
- Web archive: 119 snapshots spanning 2004–2026, covering 23 tracked years.
- Hosting and transport: served from AS20473, AS-VULTR – The Constant Company, LLC, US; TLS certificate issued by YE1 with DV validation, valid to 2026-09-03.
- Homepage: lists more than 30 brands, 500+ vehicles in stock, and 13+ authorised dealers.

What to Verify Next

Before finance approval or a major vehicle transaction, the dealership identity, applicable commercial authorizations, lender relationship, pricing, and payment instructions should be matched against independent official records and independently sourced contact channels.

- Finance page: provides an online finance-application pathway suitable for lender and terms verification.
- About Us and dealer-location pages: provide entity and branch details for independent matching.
- Contact and service pages: provide channels that can be cross-checked through an independently obtained telephone number or physical dealership record.

Summary Verdict

Eastvaal Motors presents as a legitimate, established, and trustworthy commercial website with a coherent identity and clean risk profile. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF, resolving to a single hosting address. This provides less edge-layer mitigation than CDN-backed infrastructure, but the observed configuration is technically coherent and does not conflict with the site's high-trust assessment.

Closing Assessment

Standard browsing, account interaction, enquiries, and ordinary dealership transactions are appropriate, with independent confirmation reserved for high-value finance or payment commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eastvaal.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
